Company VMV for Lean Startup

Ir Prof Alan Lam, JP

Powered by Poffices.AI

Outline of the Course

Chapter 1: Preparation of Starting a Business

Ir Prof Alan Lam, JP

Powered by Poffices.AI

How to Create a Successful Company

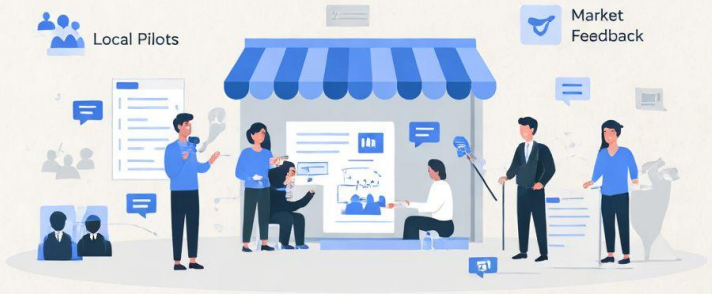

Steps to Prepare for Starting a Business

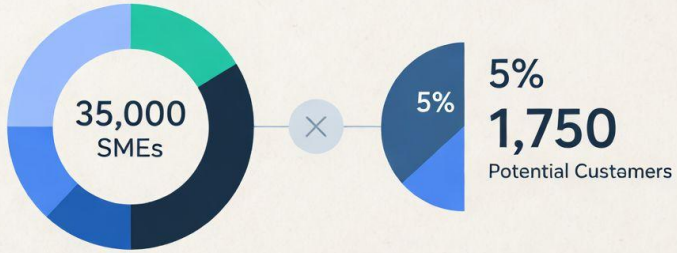

Business Idea Validation Methods

1

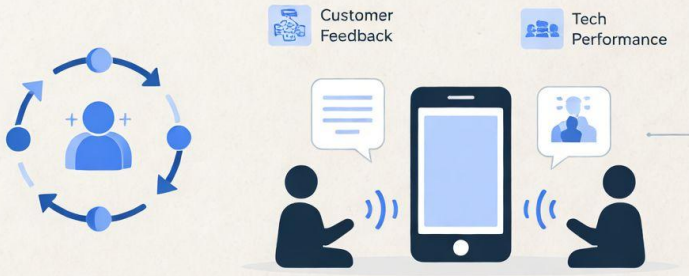

Empirical Validation via Market Testing

Mathematical Market Penertation Modeling

Minimum Viable Product Approach

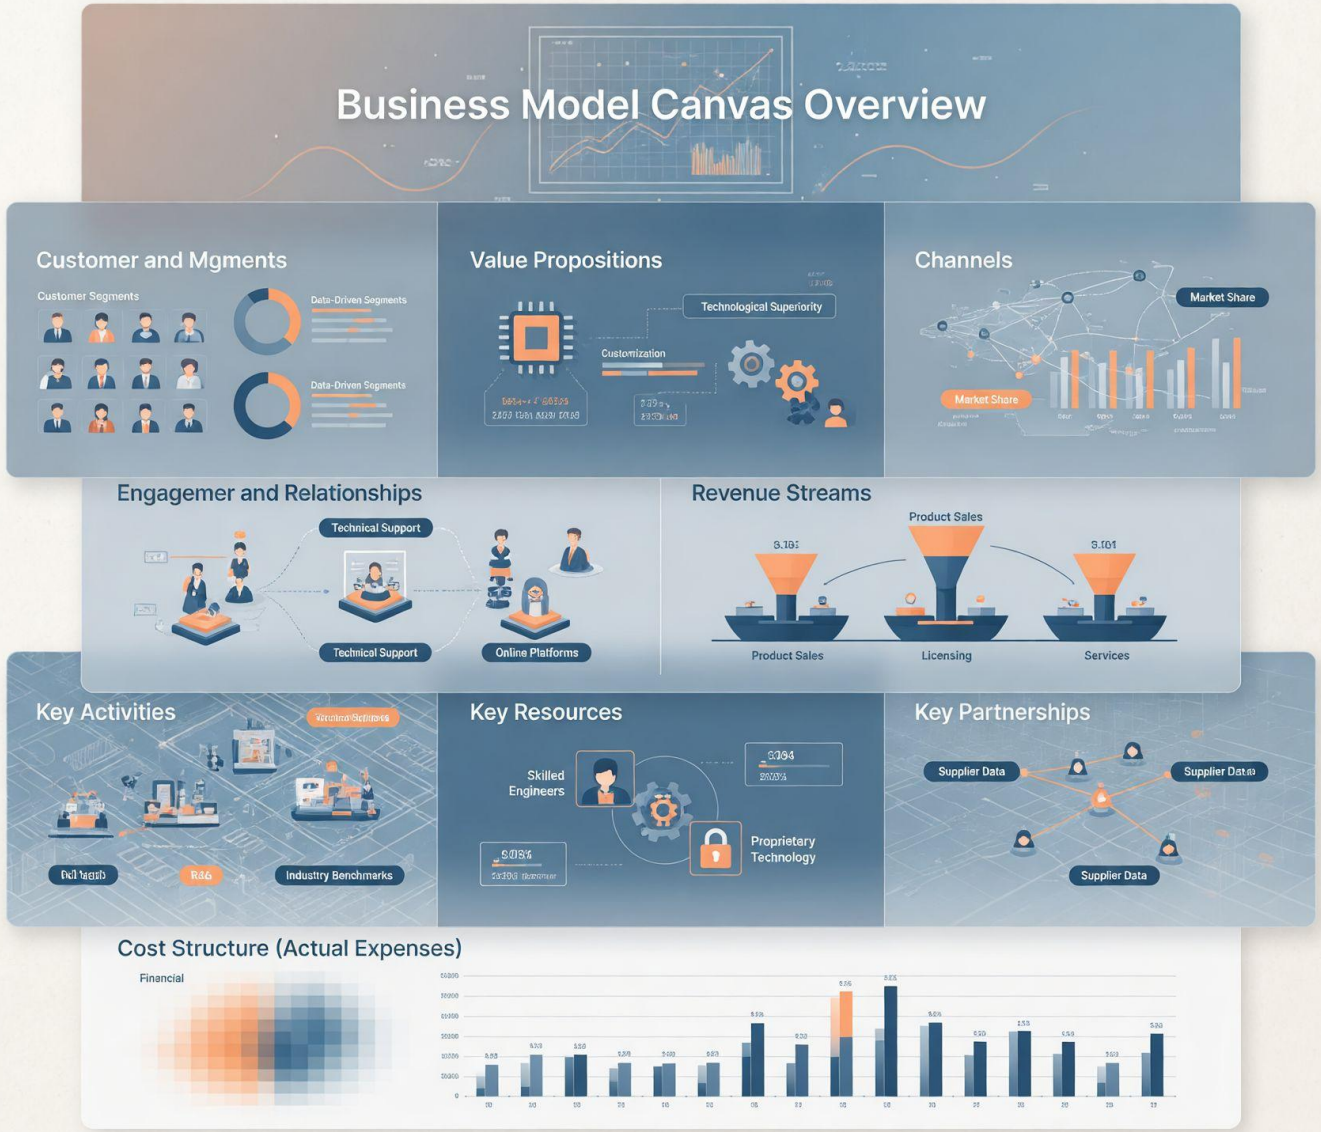

Financial Feasibility and Break-even Analysis

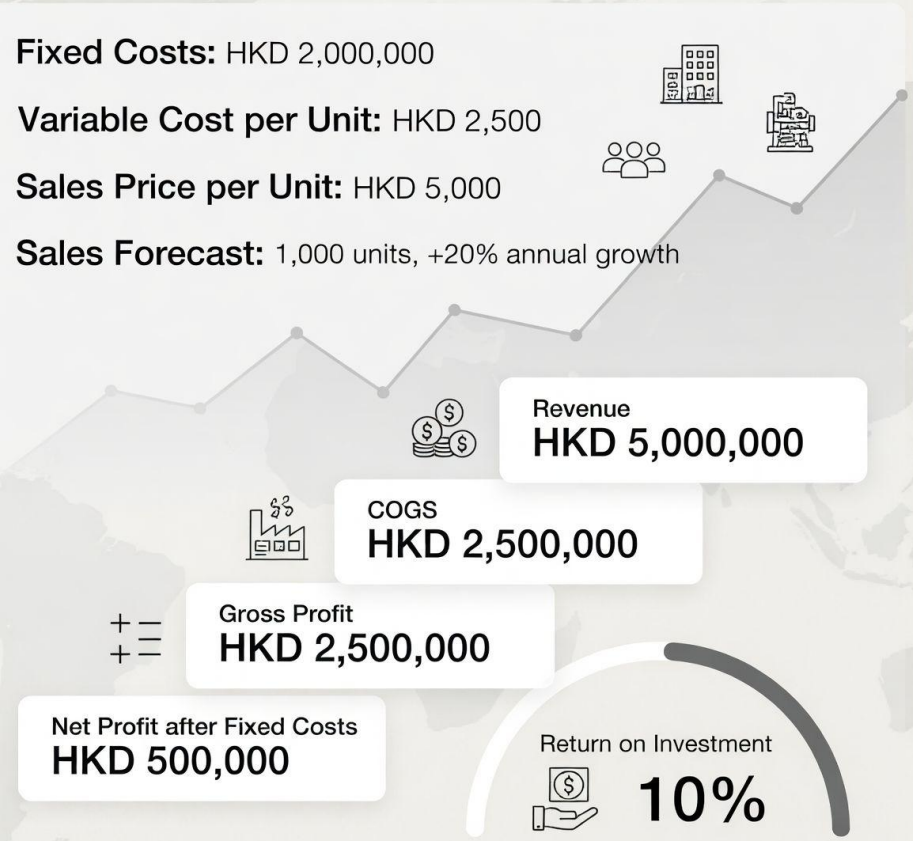

Business Model Canvas

2

Financial Projection Fundamentals

3

Step-by-Step Business Plan Construction

4

Legal and Regulatory Considerations

Chapter 2: Lean Startup Strategy

Ir Prof Alan Lam, JP

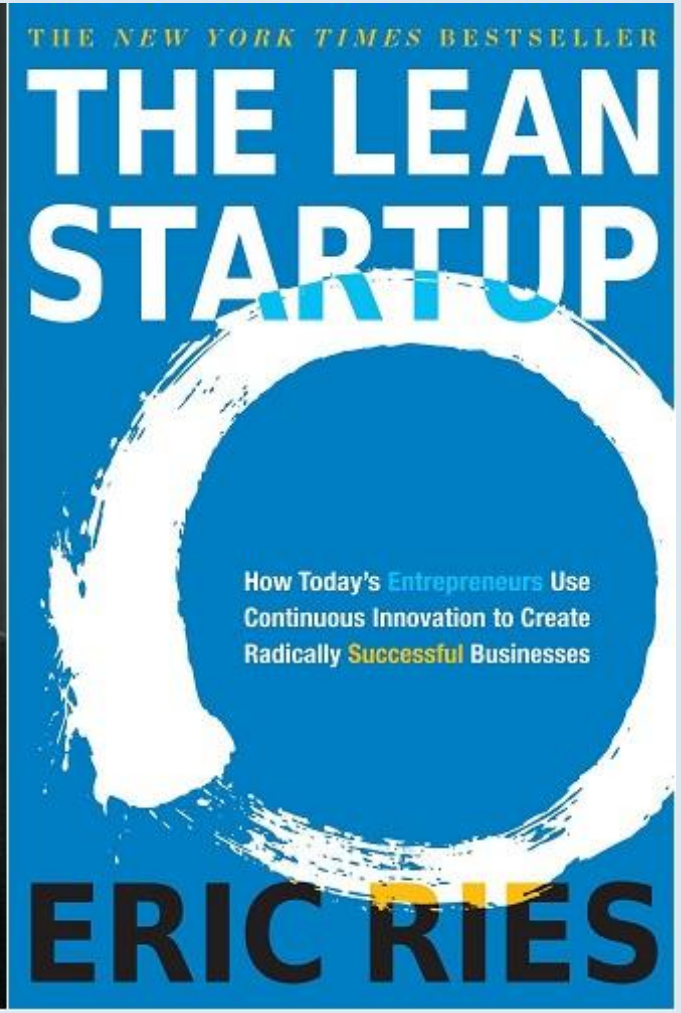

Powered by Poffices.AI

The origins of lean startup

The "Lean Startup" methodology, originally proposed by Eric Ries in 2008, emphasizes efficiency and minimizes the risks inherent in startups.

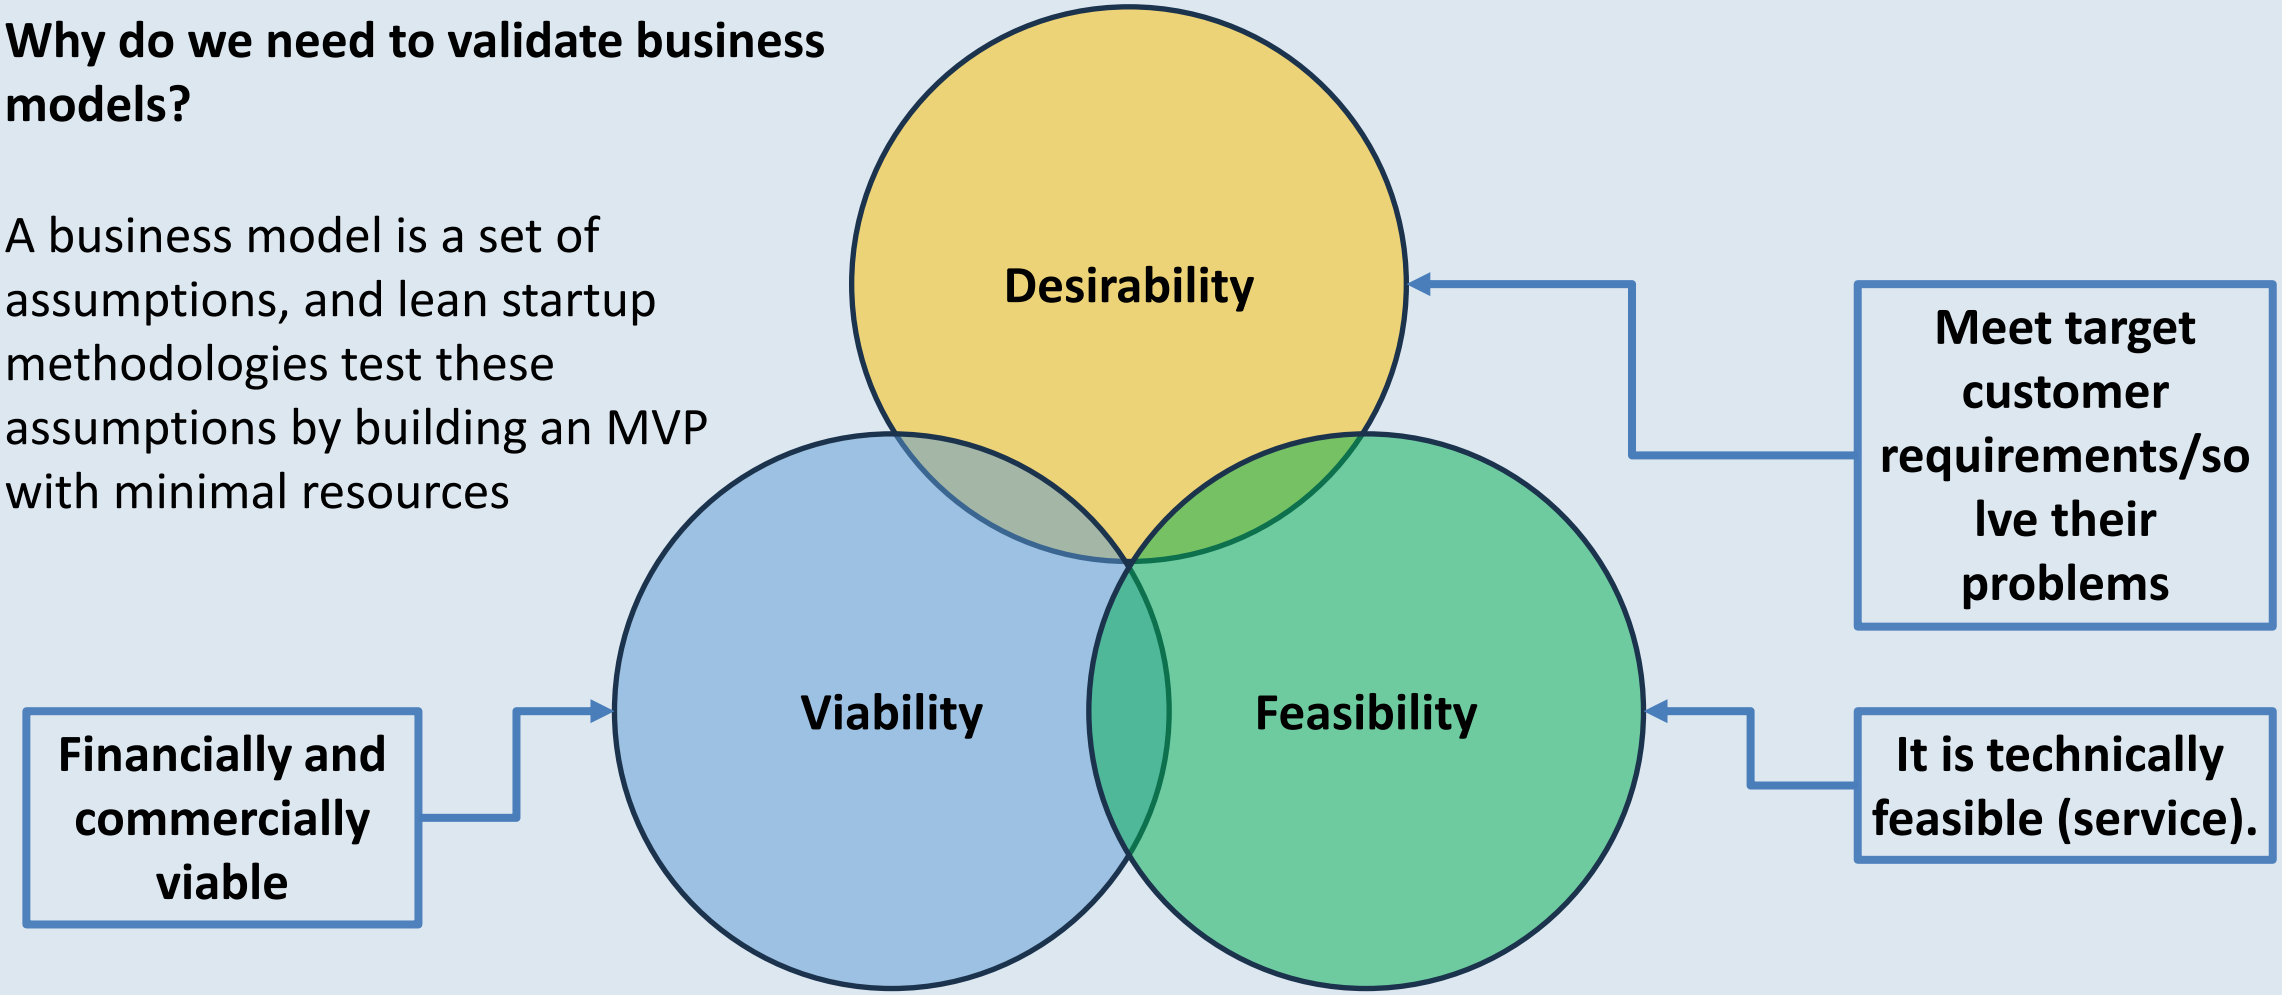

The only way to succeed is to learn faster than others.
—— Eric Ries

Lean Startup Methodology

Why do we need to validate business models?

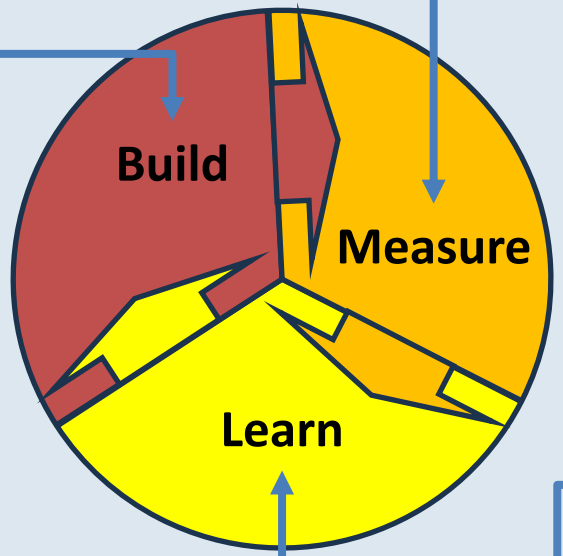

A business model is a set of assumptions, and lean startup methodologies test these assumptions by building an MVP with minimal resources

Three principles of lean startup methodology

Focus on lean startup methodology
Validate business models and find product-market alignment

Turn ideas into products to create the most valuable products

Receive customer responses
Identify early adopters

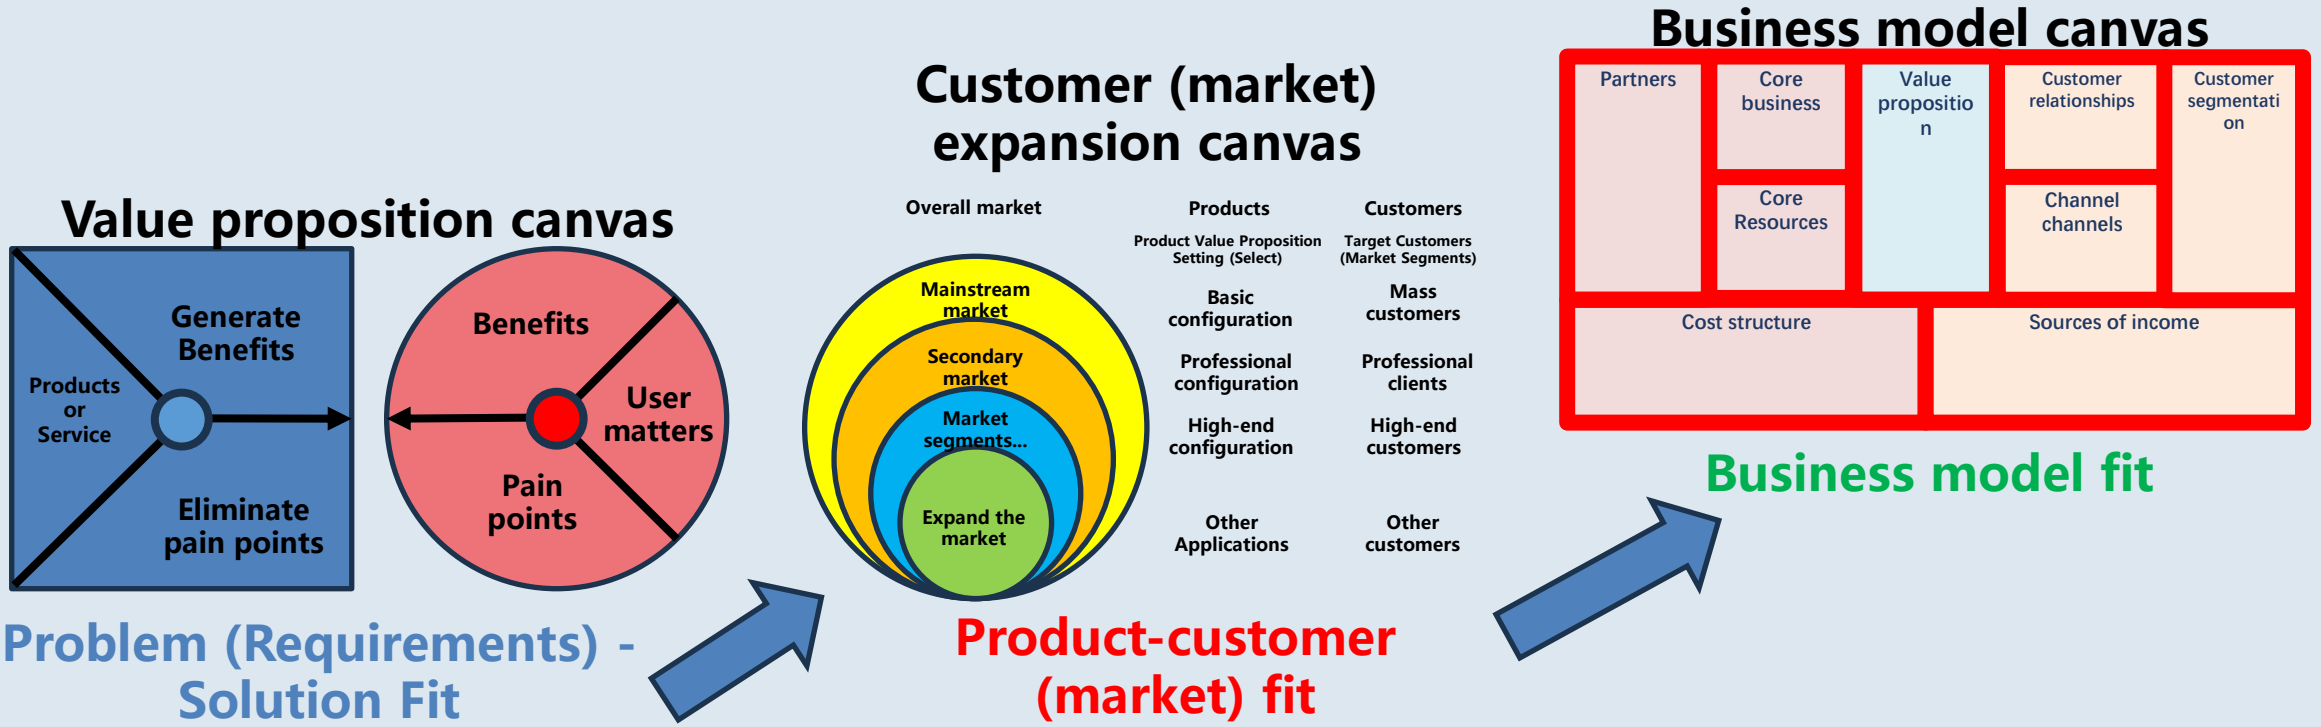

Iterate based on customer feedback to adjust development strategies

- A business model is a set of assumptions about how to turn an innovative idea into a viable business that is technically viable and financially profitable.
- Therefore, you should verify each hypothesis before you start actually building your business.
- However, there is often no way to verify some of these hypotheses without testing.
- The Lean philosophy is to conduct these tests at the smallest scale necessary, with an iterative and agile learning methodology.

Lean Startup is a Progressive Learning Process

Importance of Researchers and Technology Transfer Professionals Learning Lean Methodologies:

- Bridging the gap between laboratory research and market applications
- Develop an entrepreneurial mindset and stimulate the business and market thinking of researchers and technical managers
- Promote the maturation and readiness of basic research/technology results
- Facilitate technology transfer and commercialization through market validation

Principles of Lean Startup

Build-Measure-Learn Feedback Loop

Build Phase:
Creating the MVP

Build MVP: Test Hypothesis

Learn Phase:
Hypothesis Validation
& Decision

Learn → Pivot or Persevere

Scaling & Continuous Improvement

Documentation

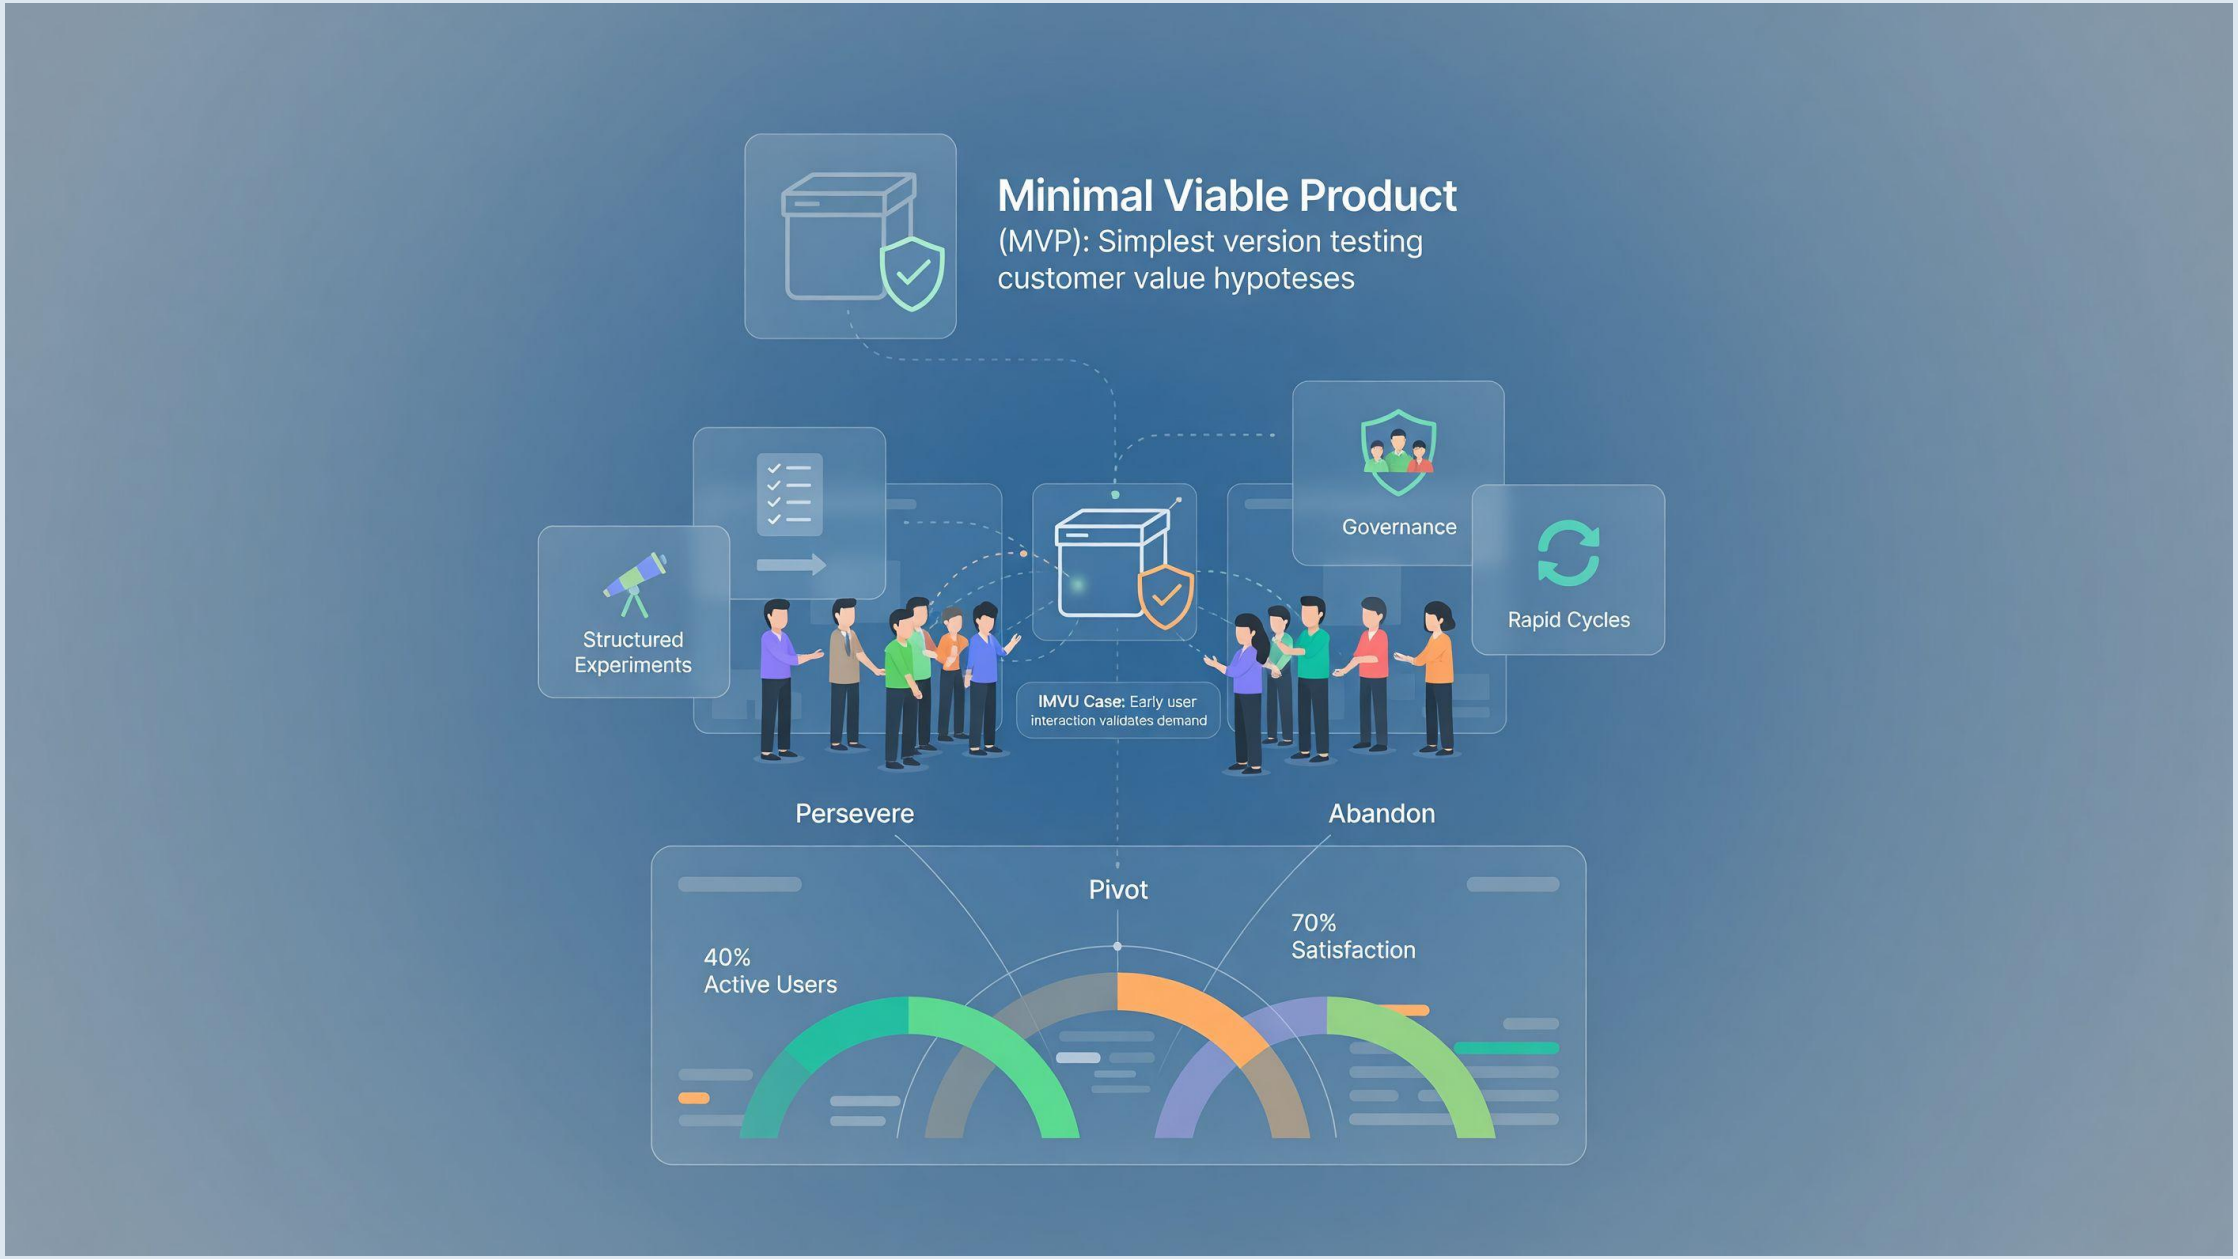

Prioritized Risk

Scale Learning Culture
& Reduce Waste

Measure Phase:
Actionable Metrics

Measure Actionable Metrics

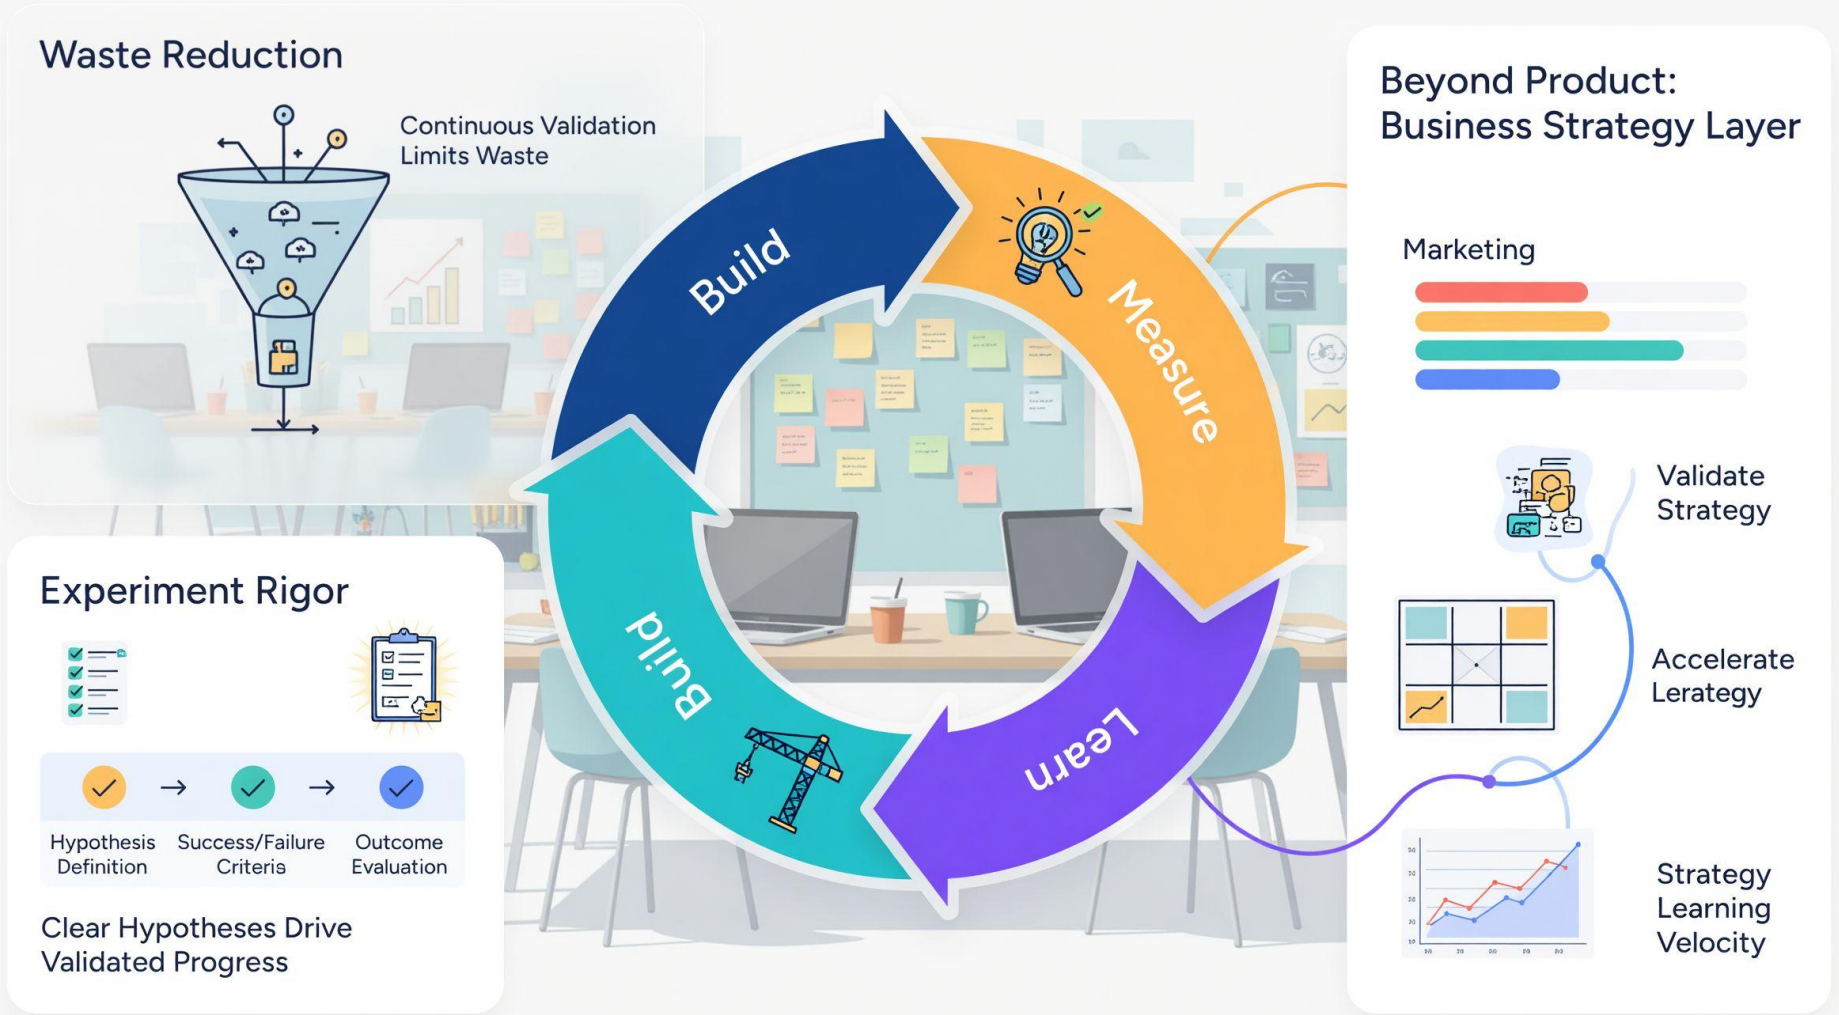

Building MVP with Real Market Feedback

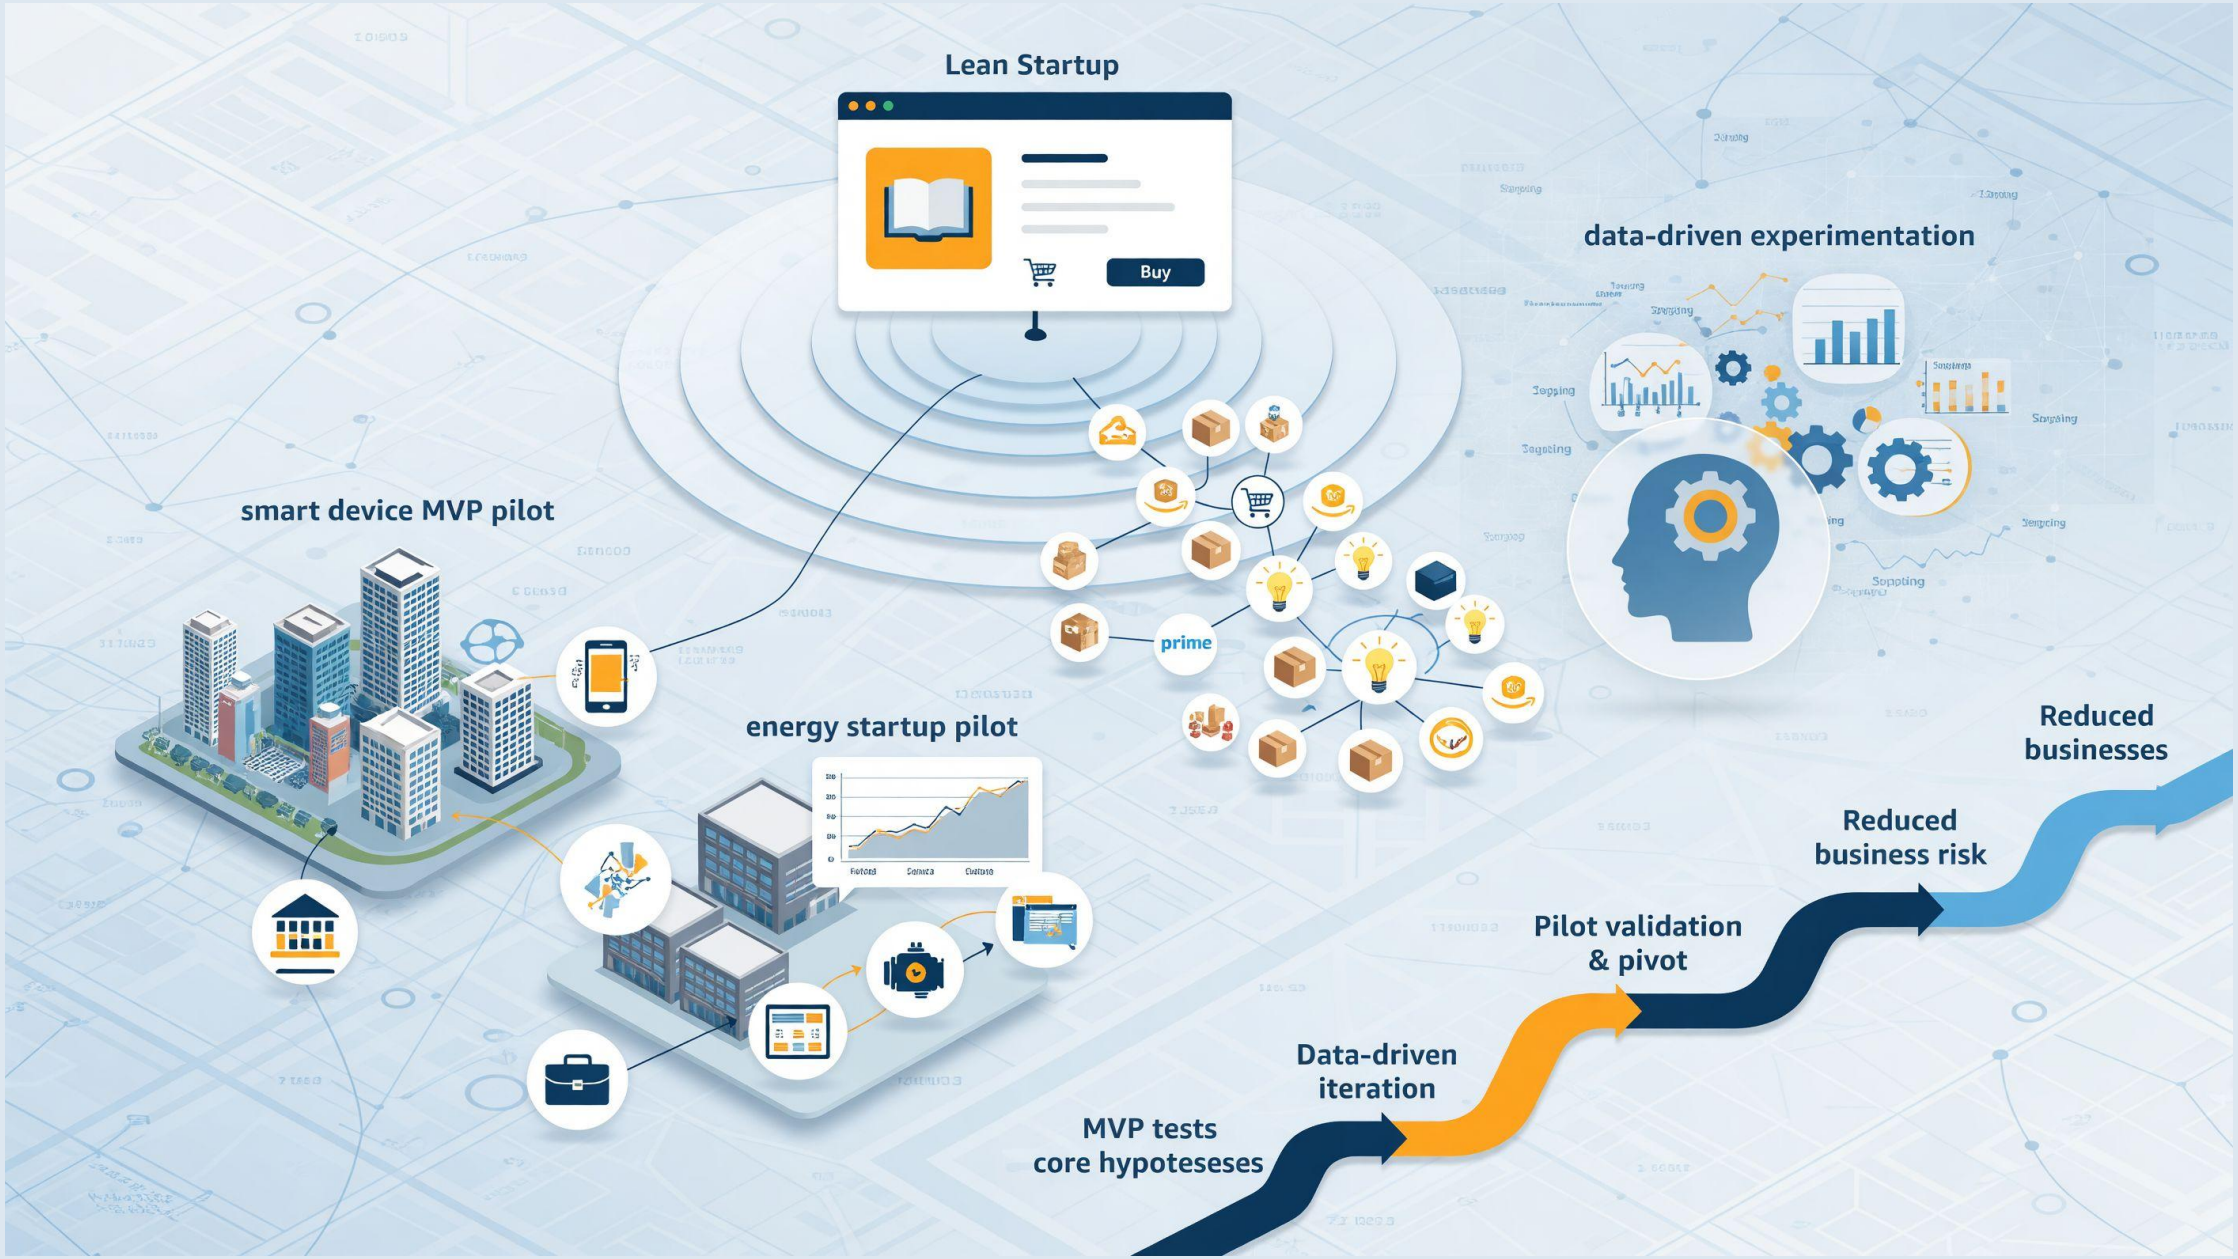

Customer Development Process

Iterative Product Development Process

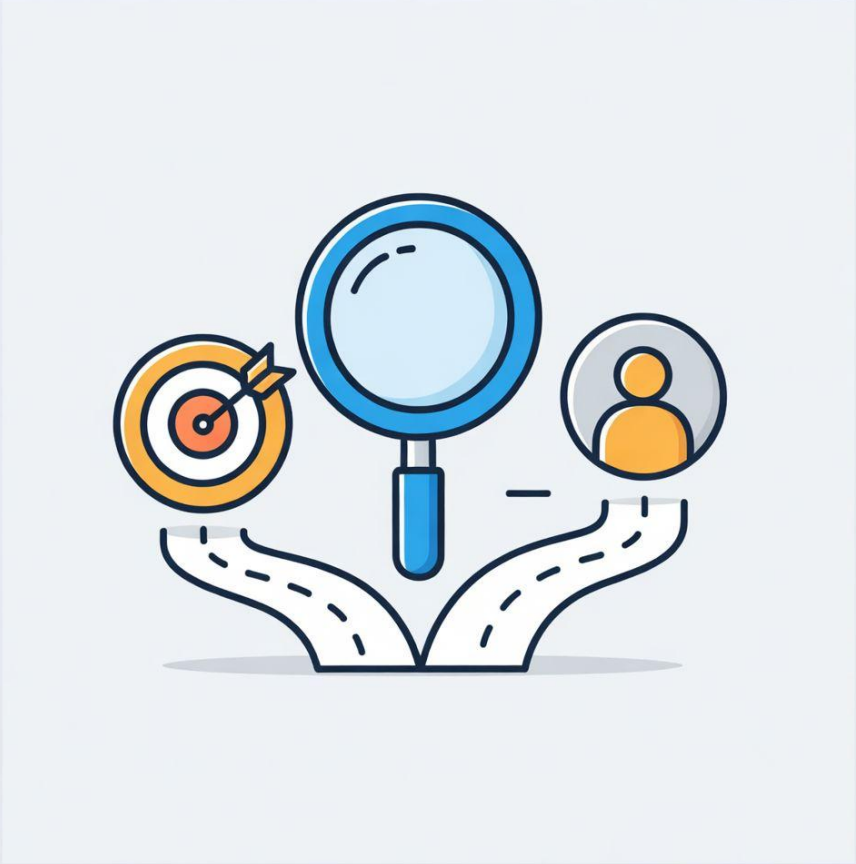

Examples of Lean Startup Application

Chapter 3: A Job to be Done Strategy and Customer Needs Analysis

Ir Prof Alan Lam, JP

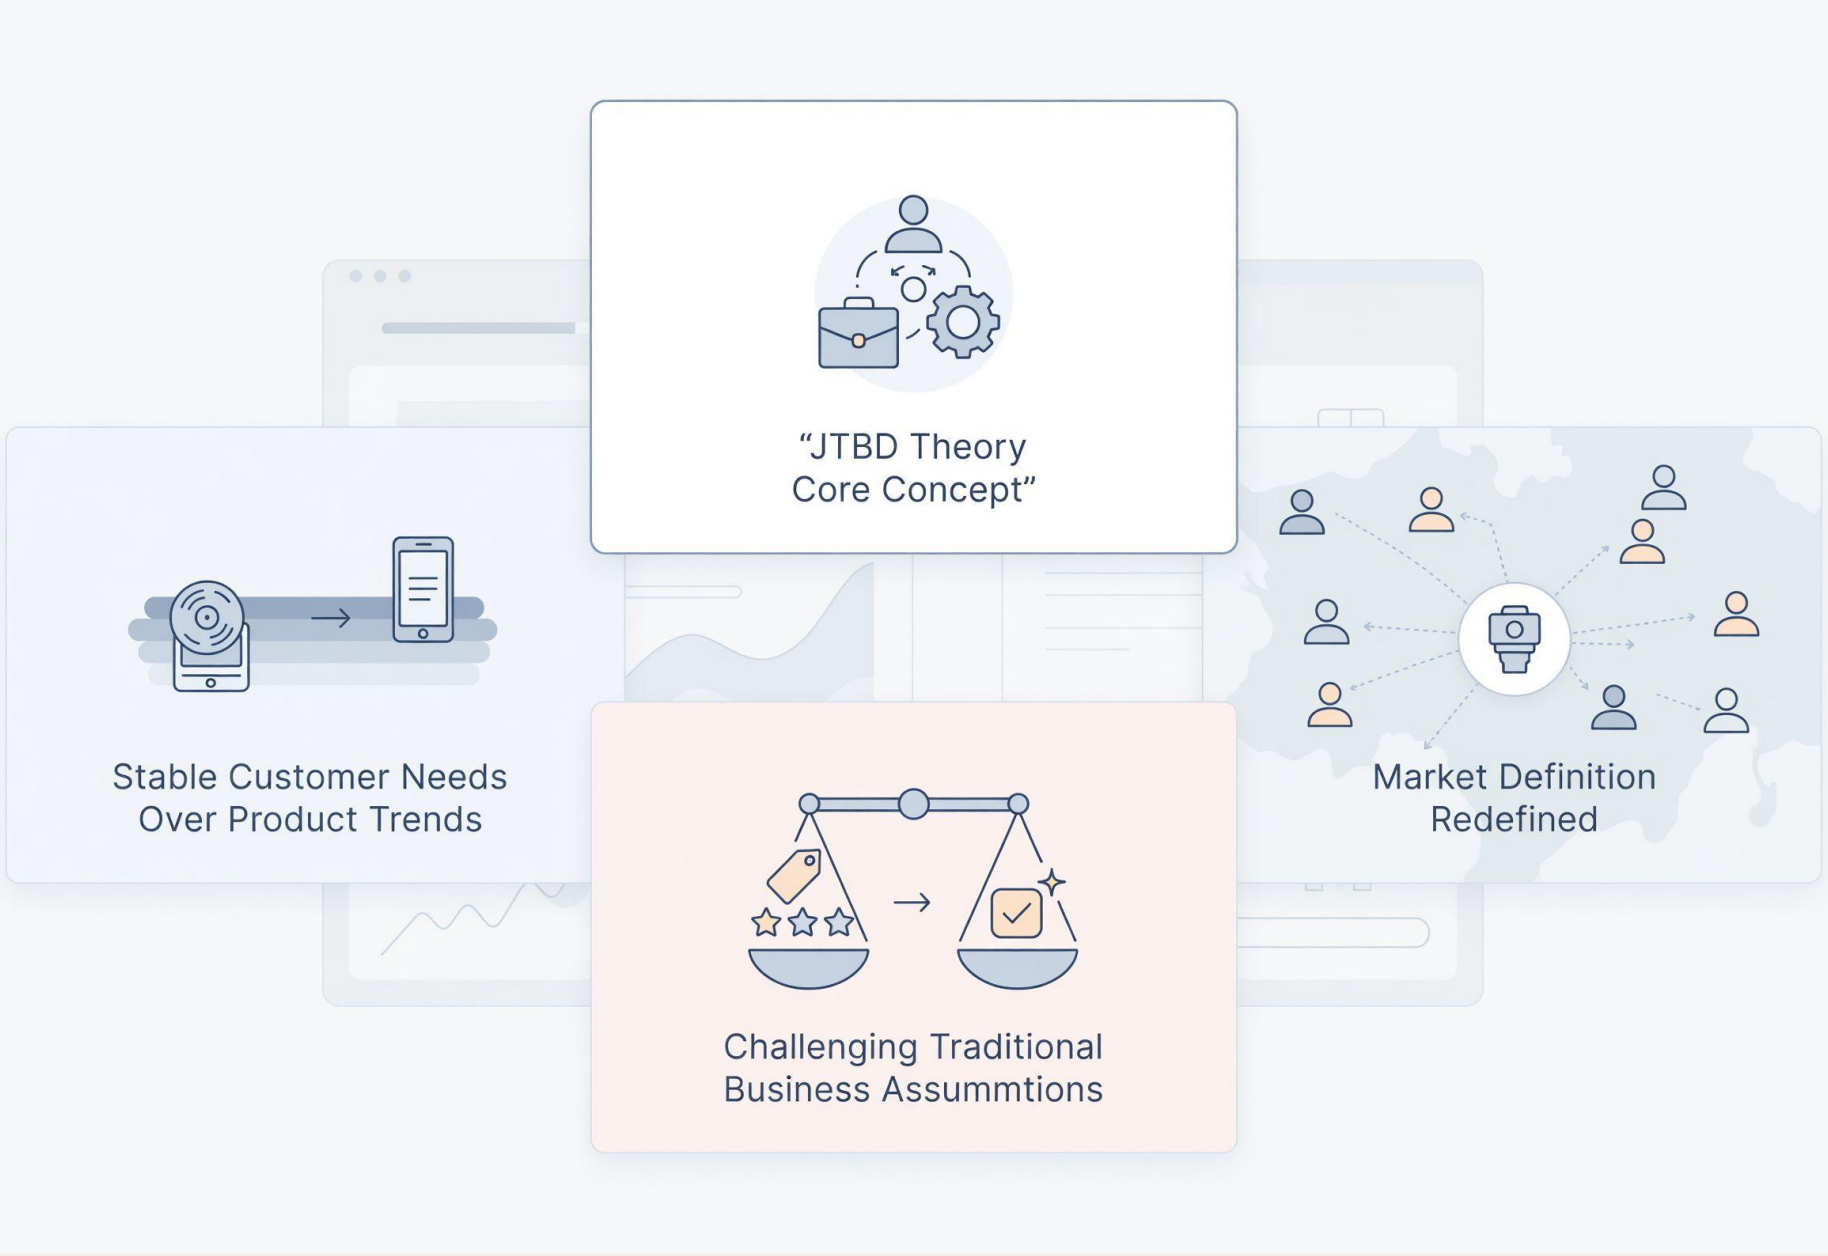

Powered by Poffices.AI

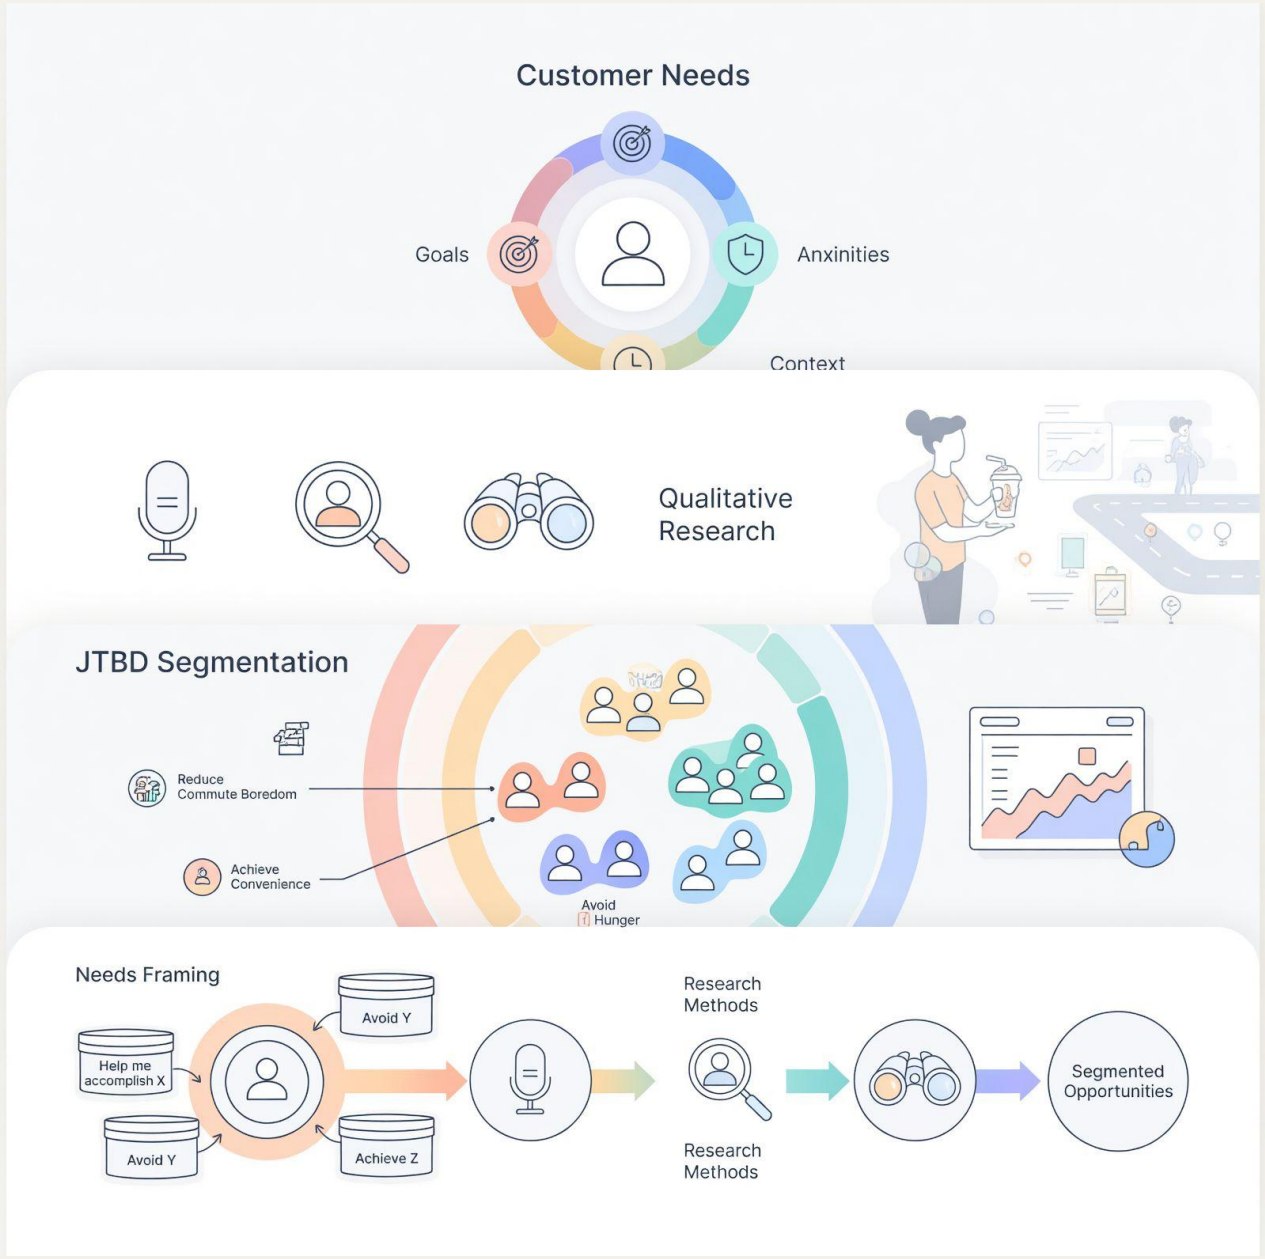

Introduction to Jobs to be Done

Understanding the 'Job to be Done' Theory

Customer Needs Identification

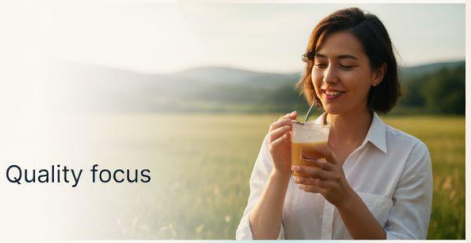

Segmentation and Targeting Strategies

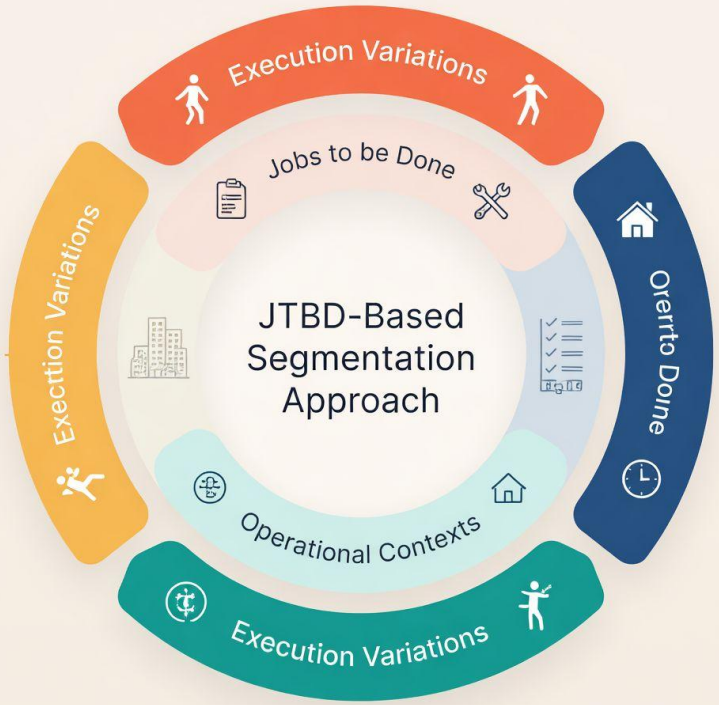

Core Market:
Job Executors and Contexts

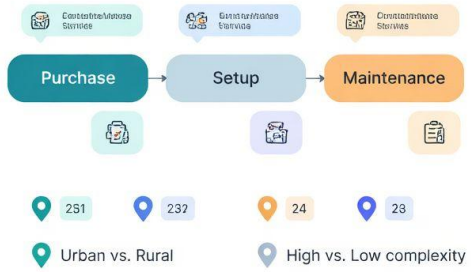

Speed priority

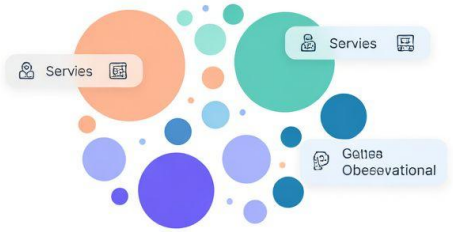

Quality focus

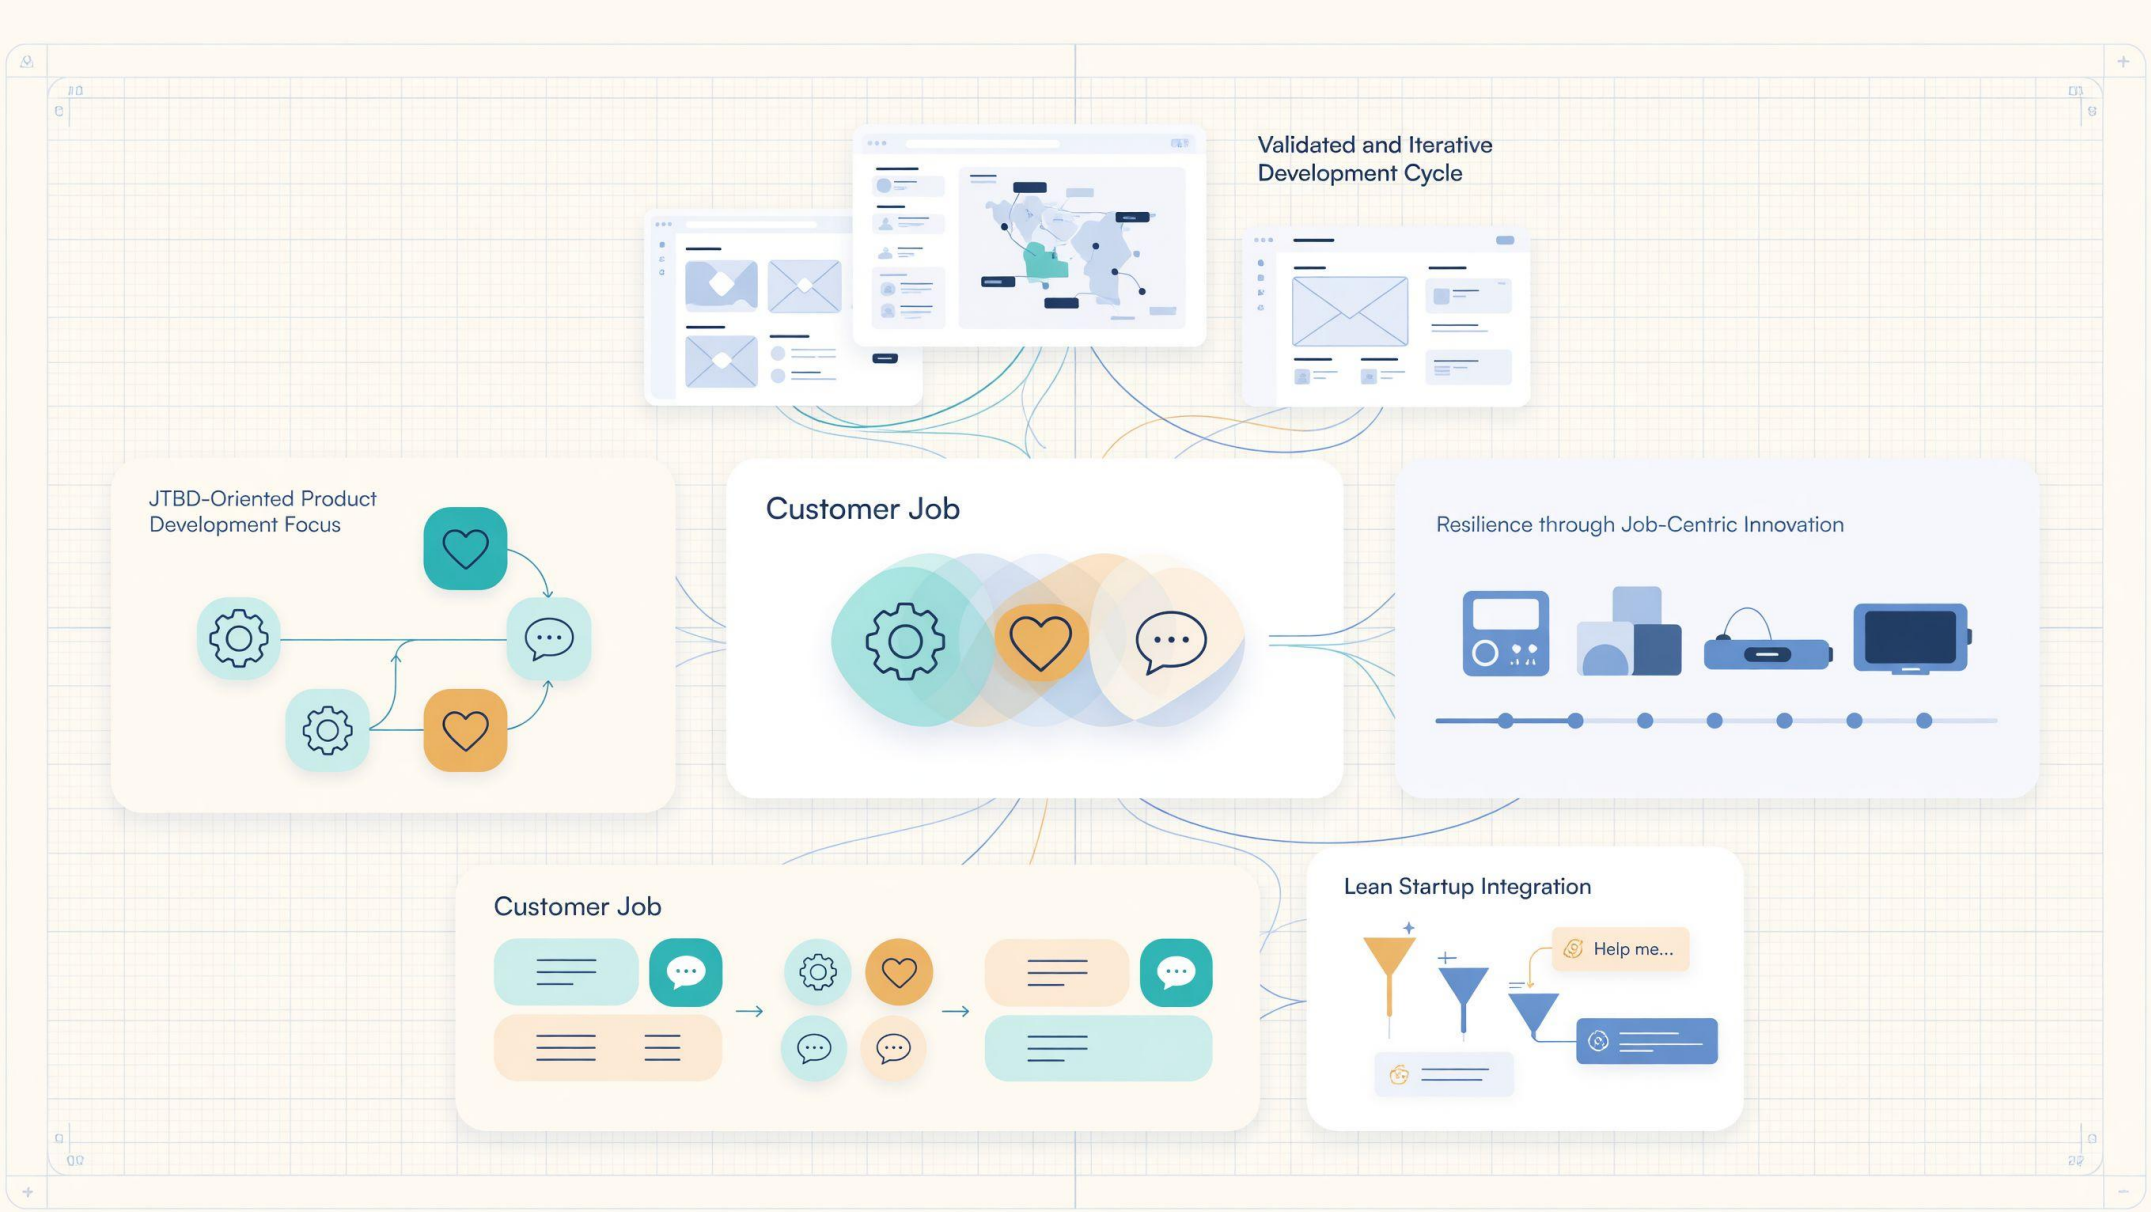

Segmentation Methods and Examples

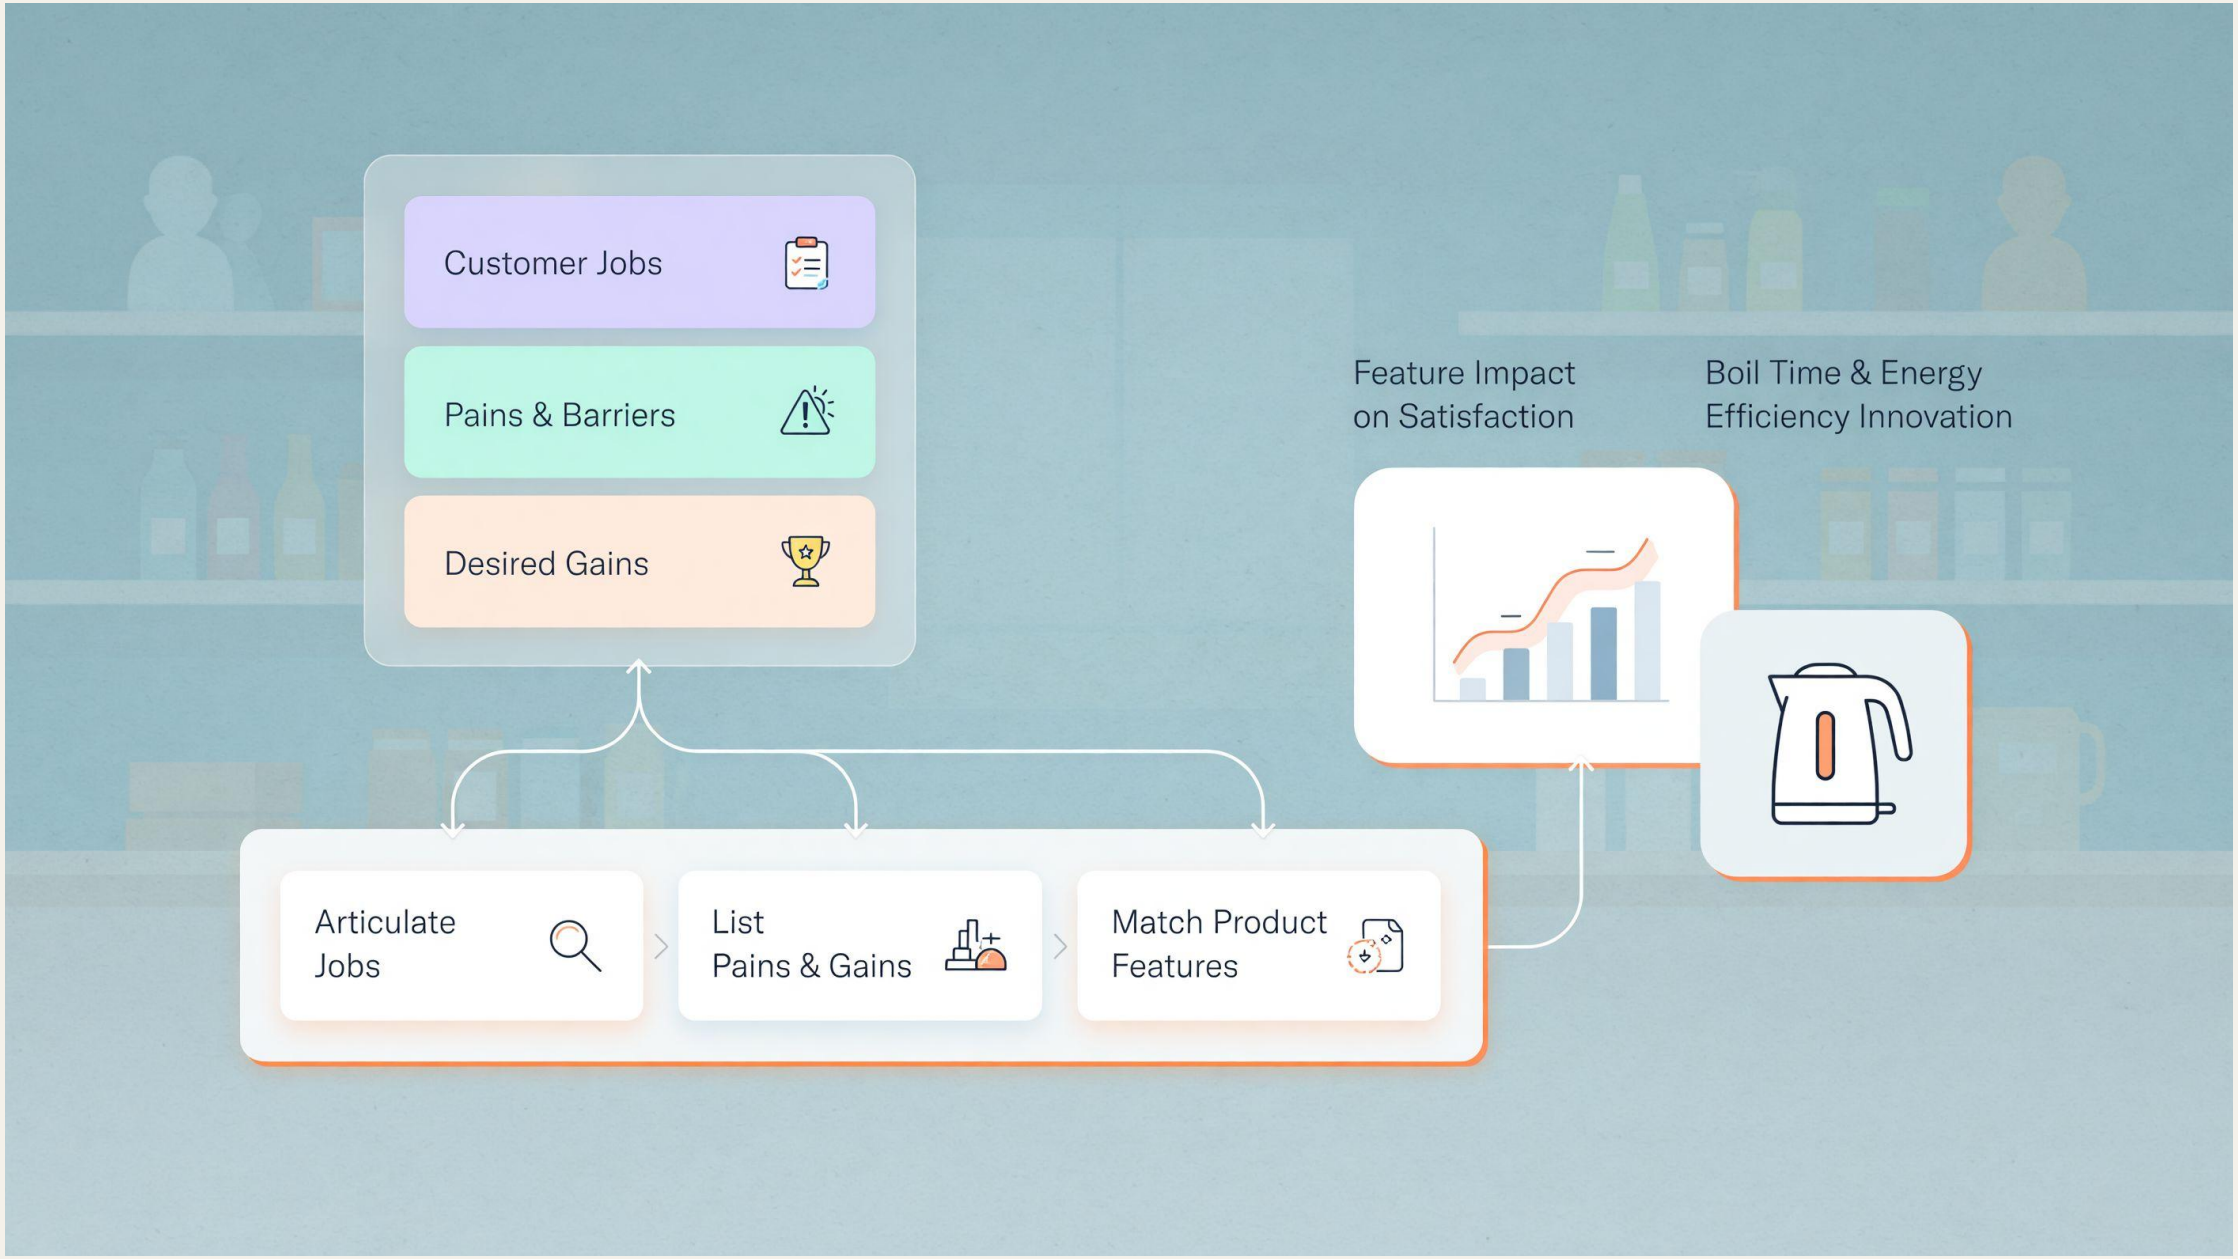

Quantitative Segmentation Techniques

Aligning Product Development with Customer Jobs

Value Proposition Mapping

Chapter 4: Company Vision, Mission, and Values Establishment

Ir Prof Alan Lam, JP

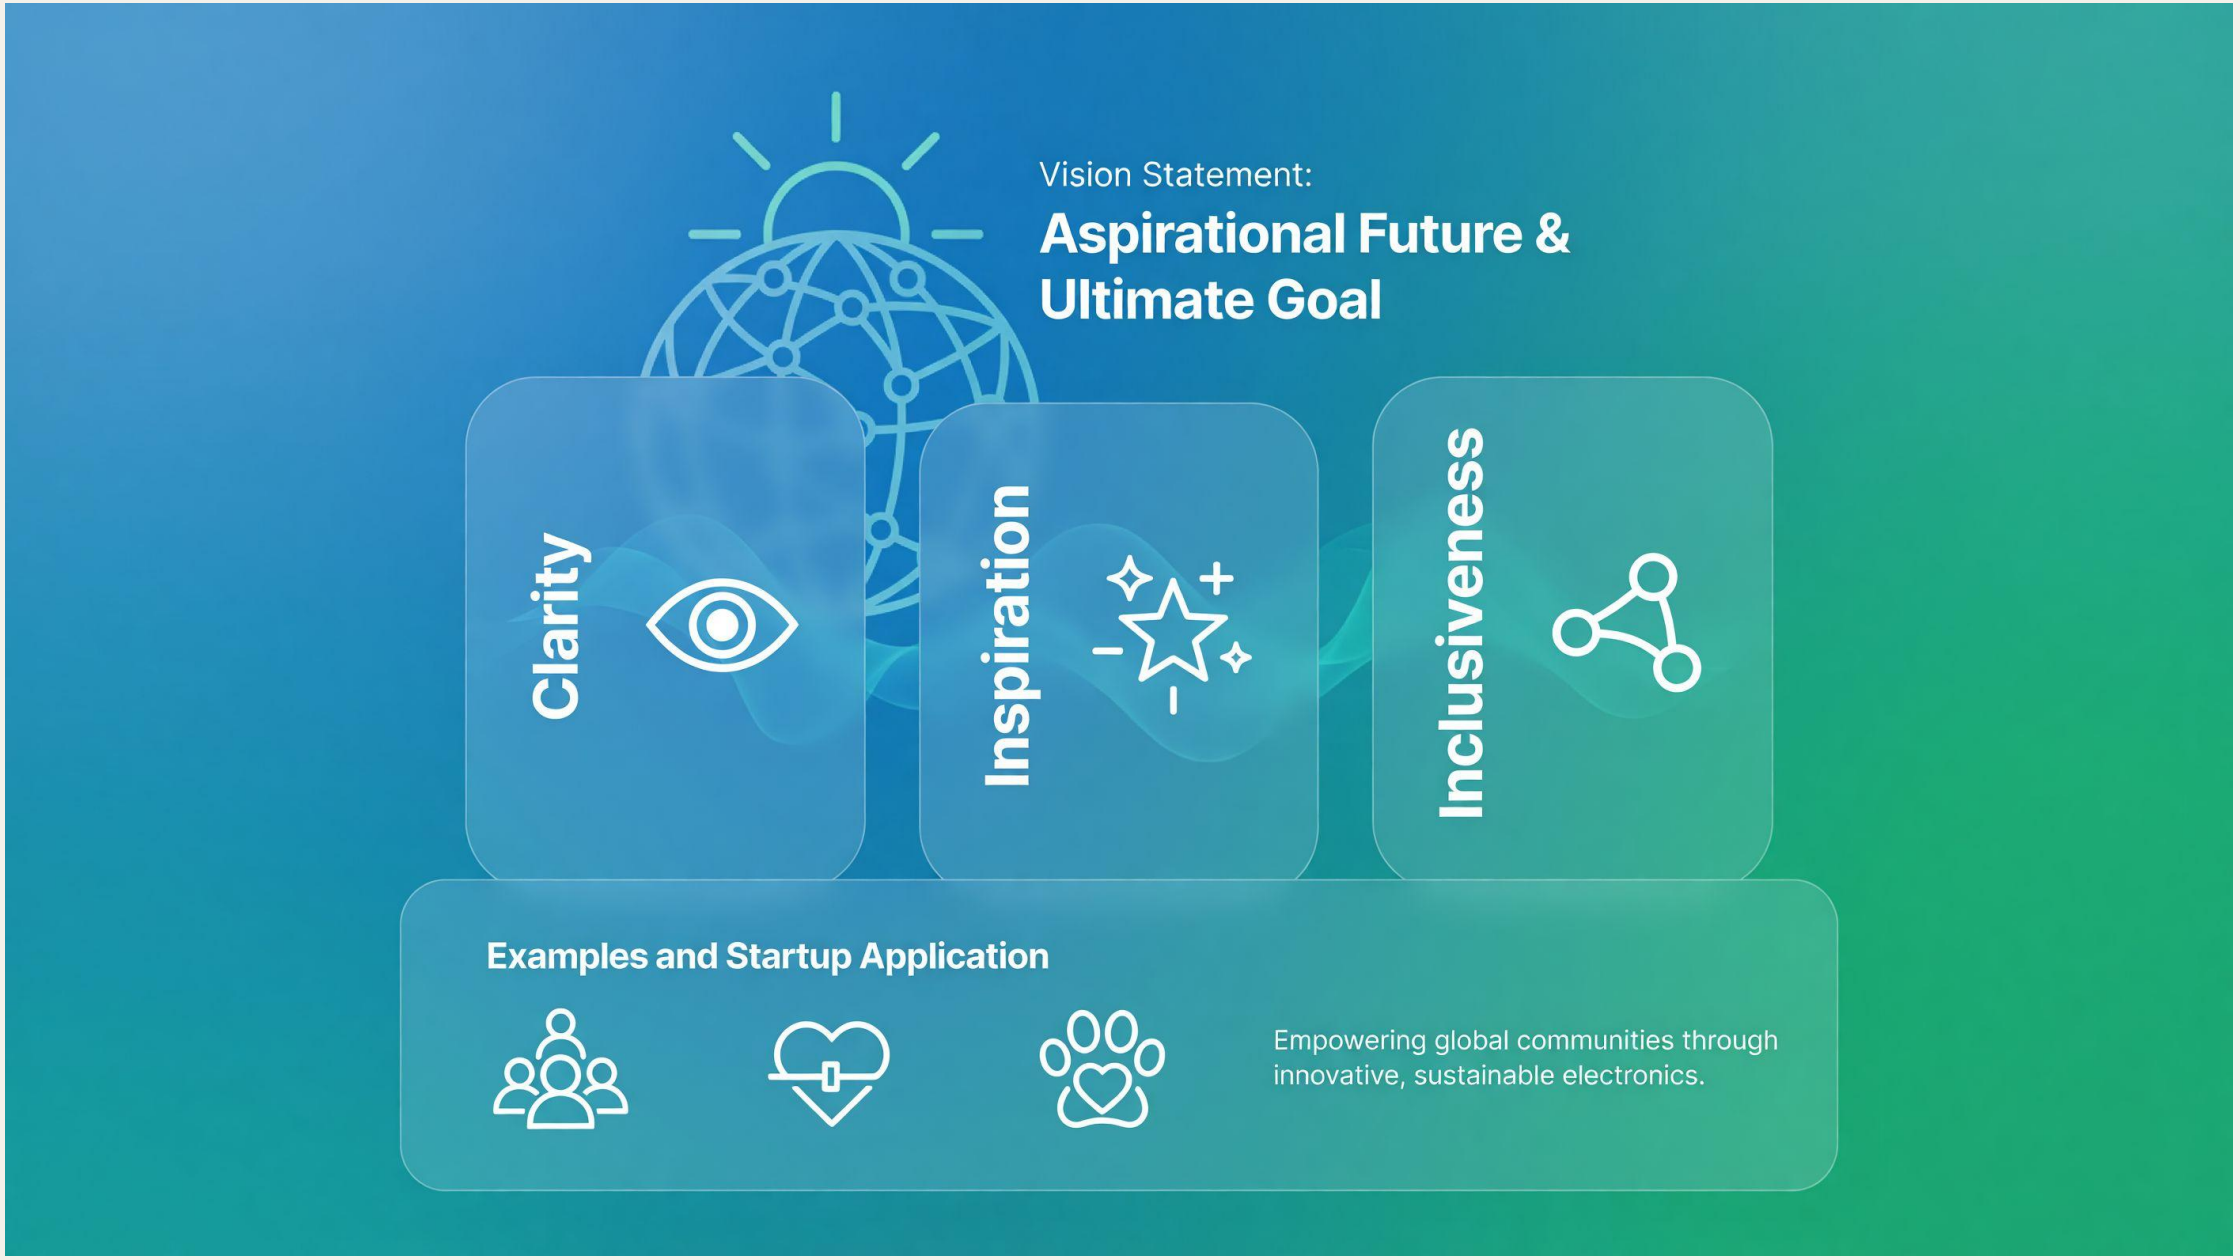

Powered by Poffices.AI

Vision, Mission, and Values Concepts

Components of Vision Statements

Formulating Mission Statements

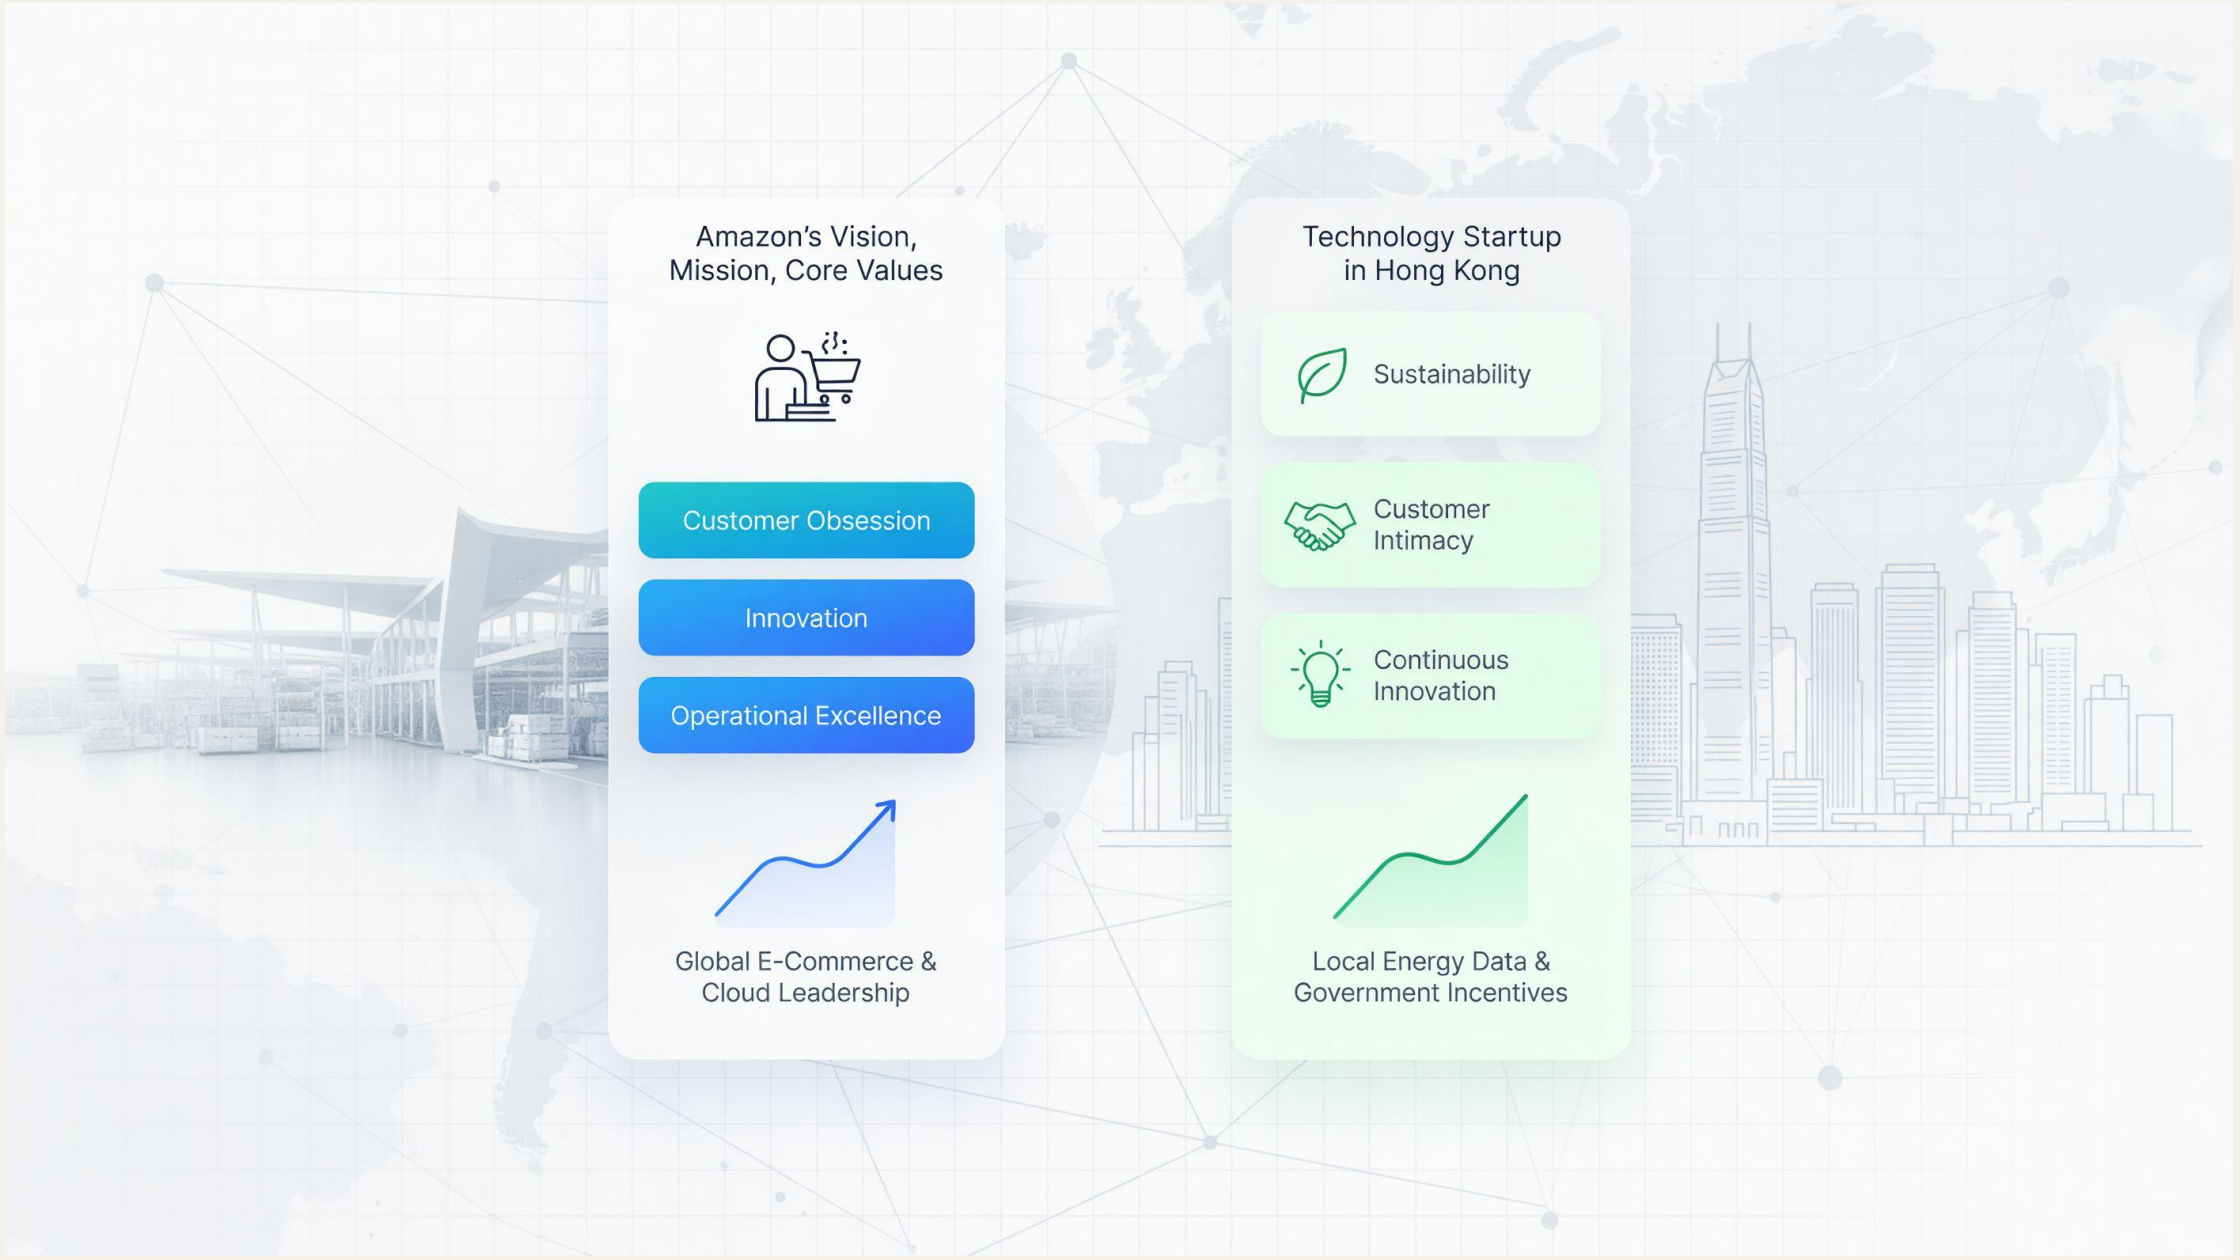

Defining Core Values

Aligning VMV with Market Reality

Practical Case Studies of VMV Establishment

Impact of VMV on Company Culture

Vision
Inspires Purpose
Long-term purpose focus

Mission
Translates to Action
Concrete operational goals

Values
Guide Behavior
Collaboration & Innovation Norms

Cultivating Belonging and Retention
Shared identity drives satisfaction & talent retention

Communication Strategies for VMV

Chapter 5: Setup Company and Incubation in Hong Kong

Ir Prof Alan Lam, JP

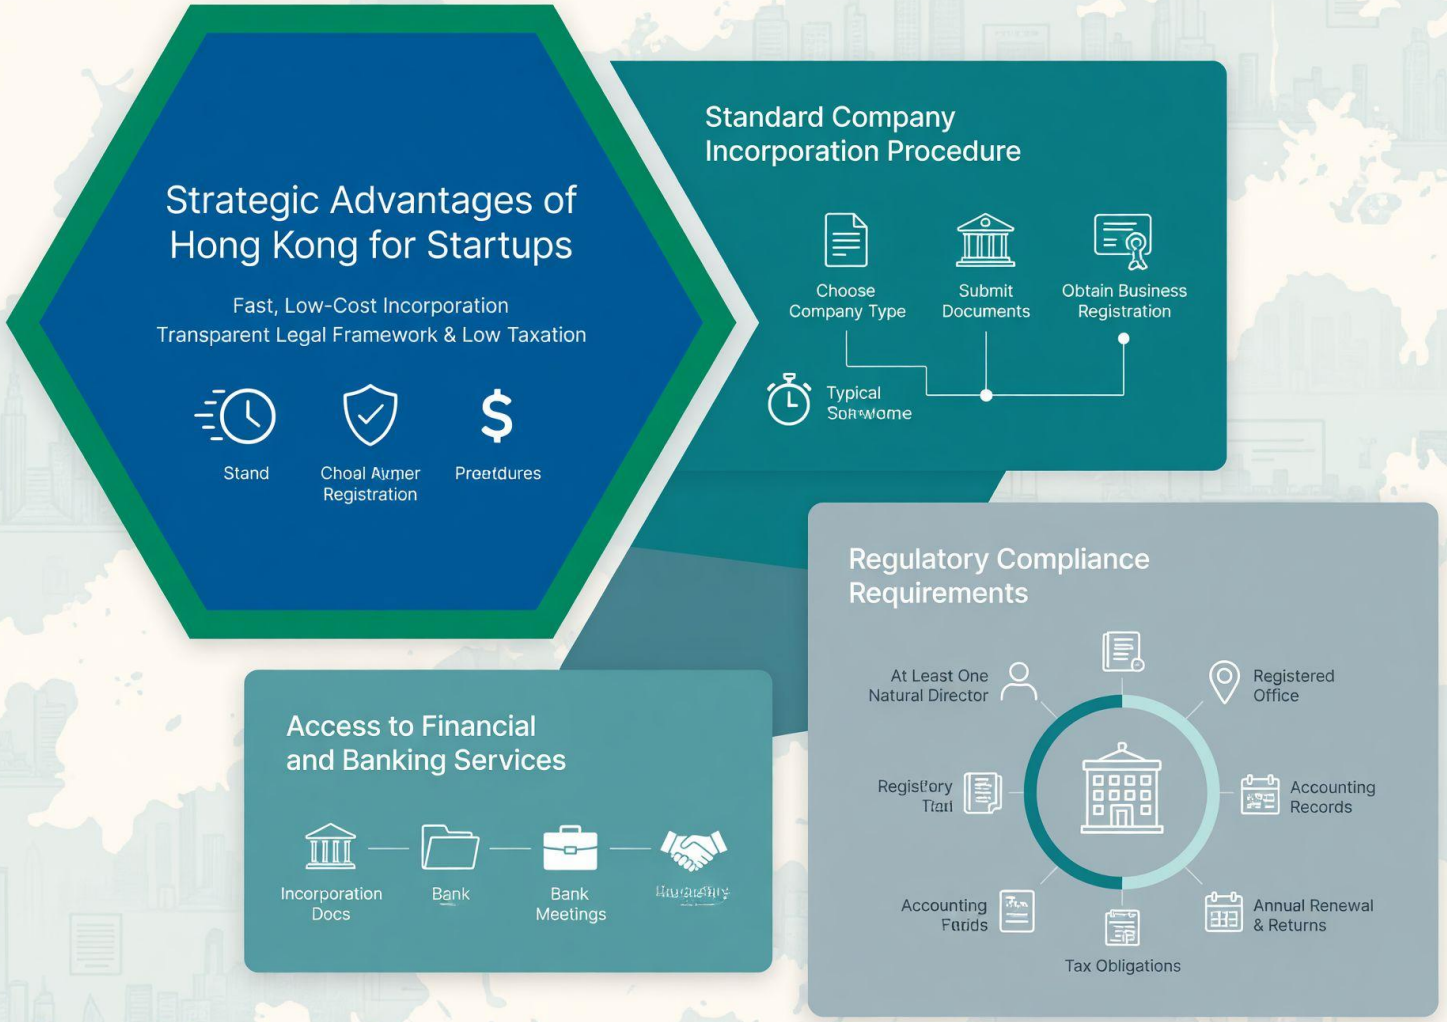

Powered by Poffices.AI

Company Formation Processes in Hong Kong

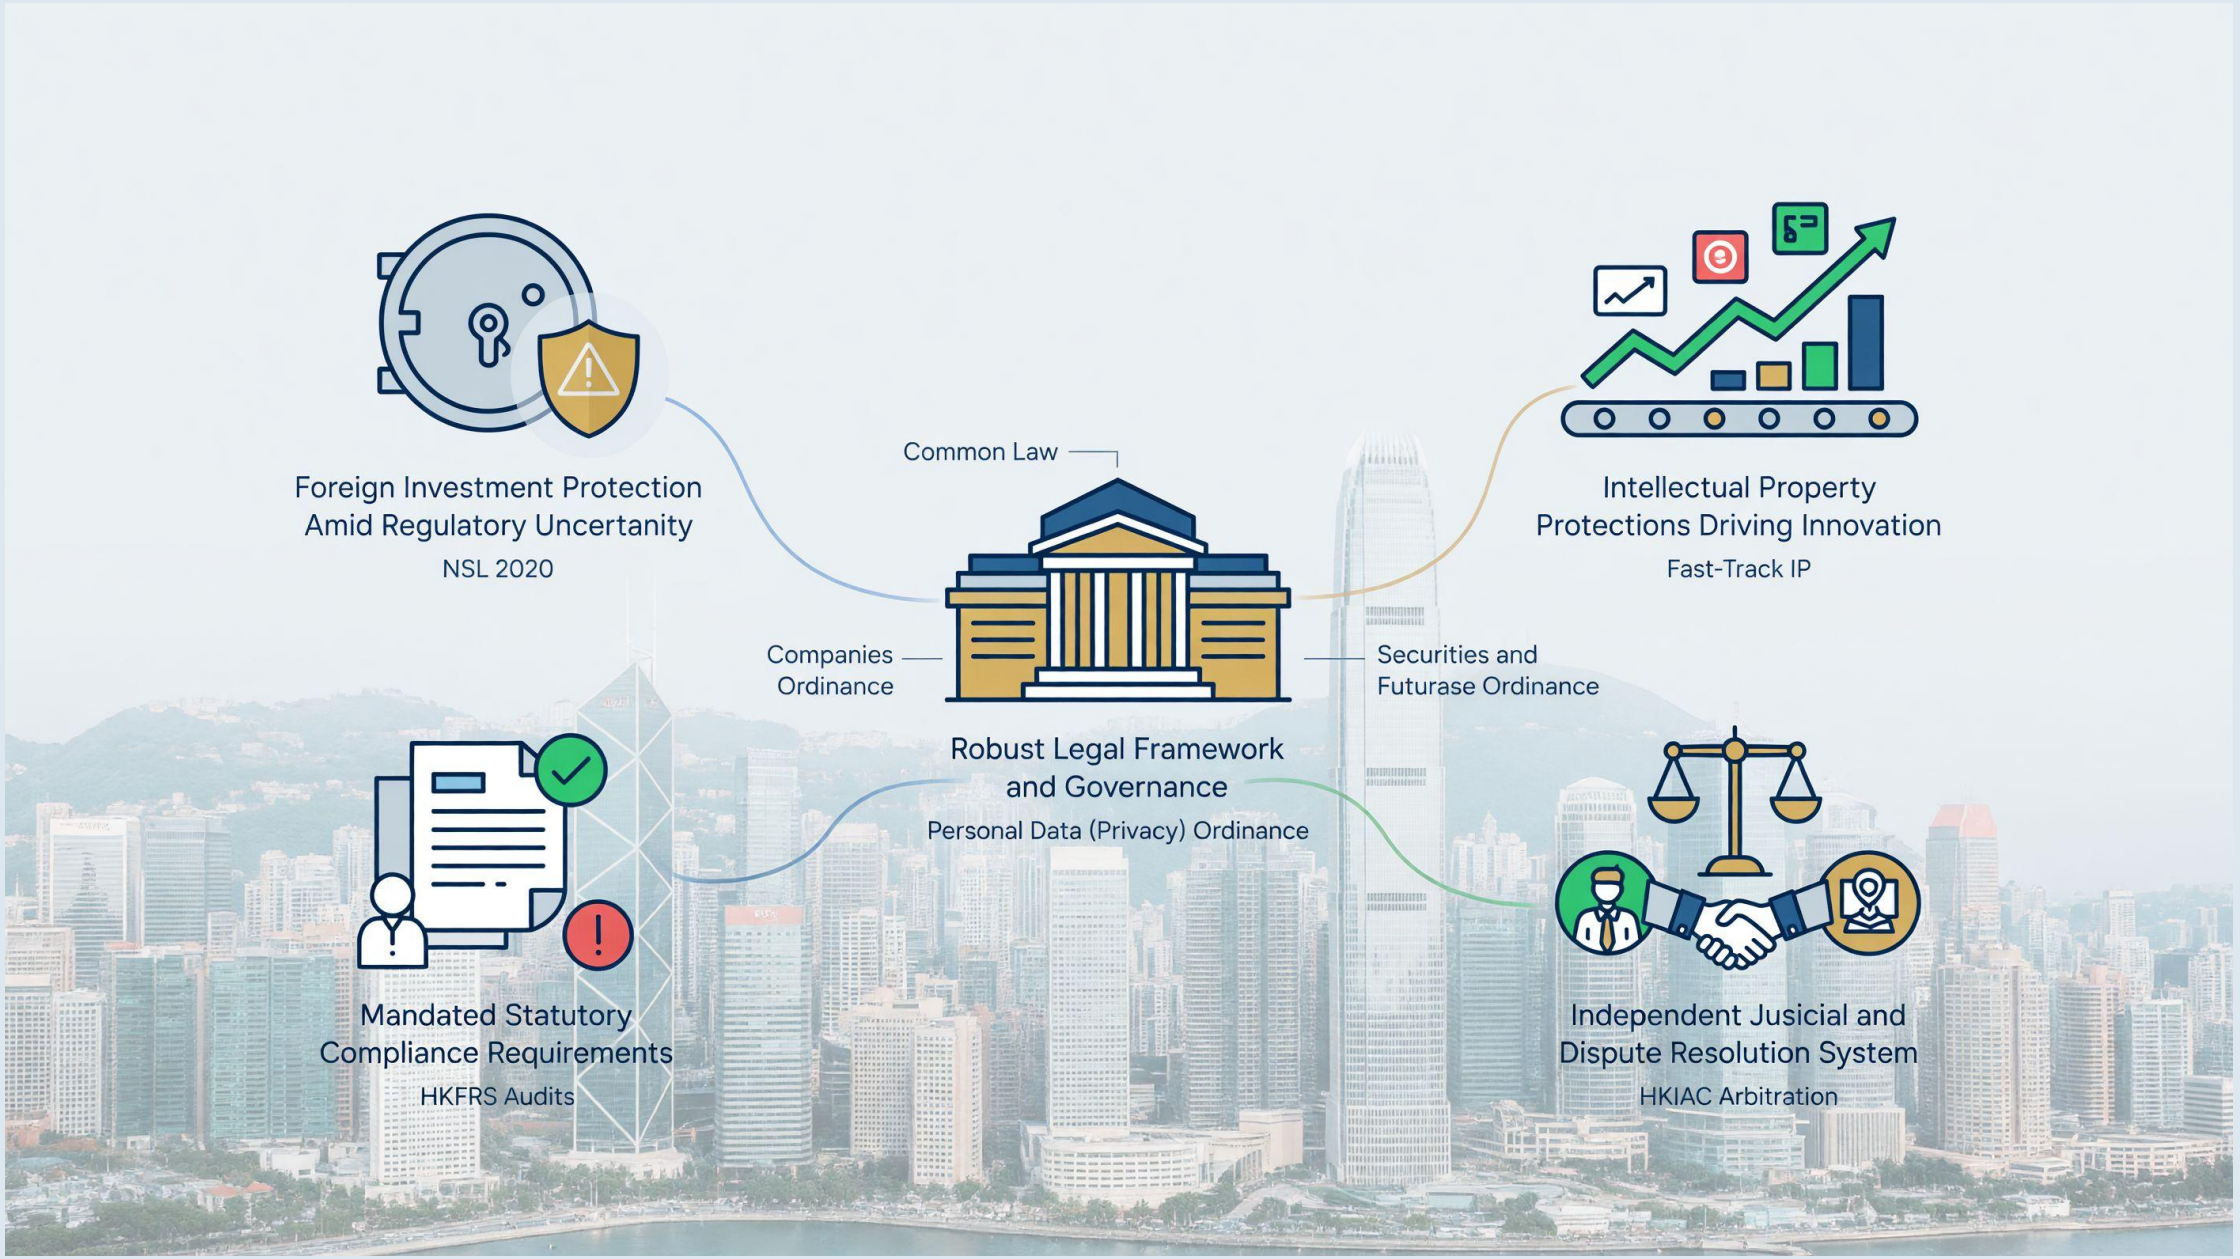

Overview of Company Setup in HK

Company Formation Processes in Hong Kong

Legal and Compliance Requirements

Incubation Programs Overview

Utilization of Incubation Programs

Strategic Benefits of Incubation Programs

- AI-Enabled Framework Support by The Founder Institute

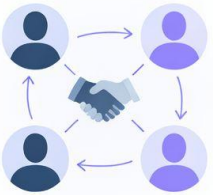

- Infrastructure and Financial Support

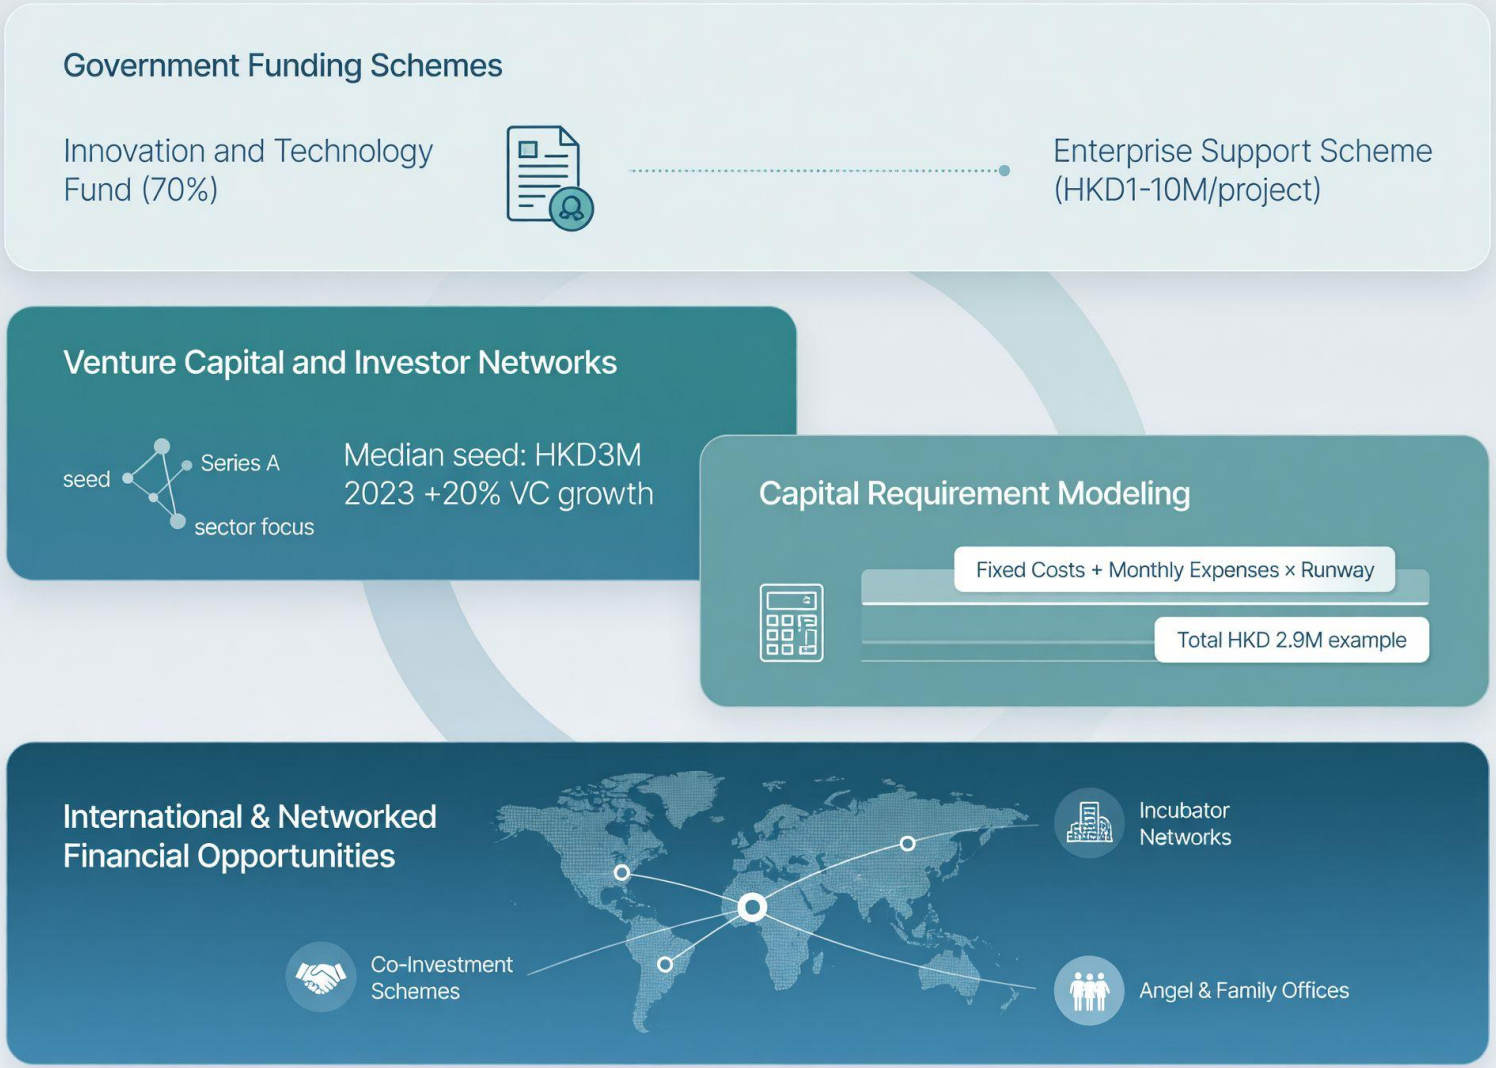

- Structured Learning and VMV Aligment

- Collaborative Ecosystem Effects and Founder Guidance

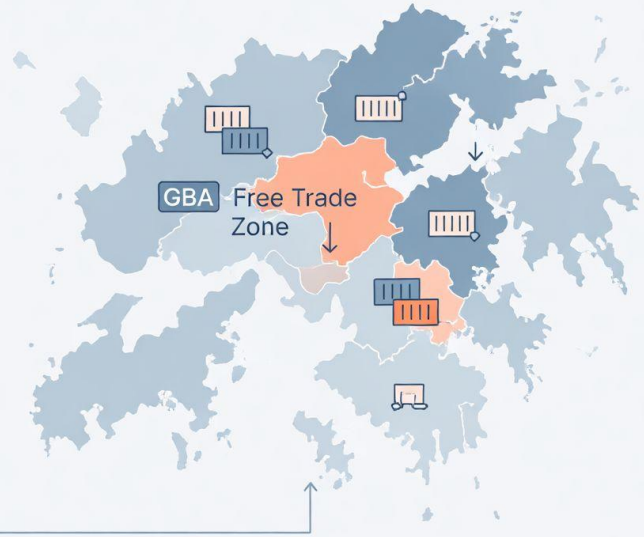

Funding Opportunities and Financial Support

Market Entry Strategies

Regulatory and Market Context

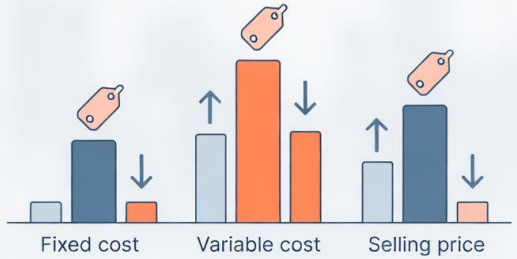

Strategic Market Entry Approach

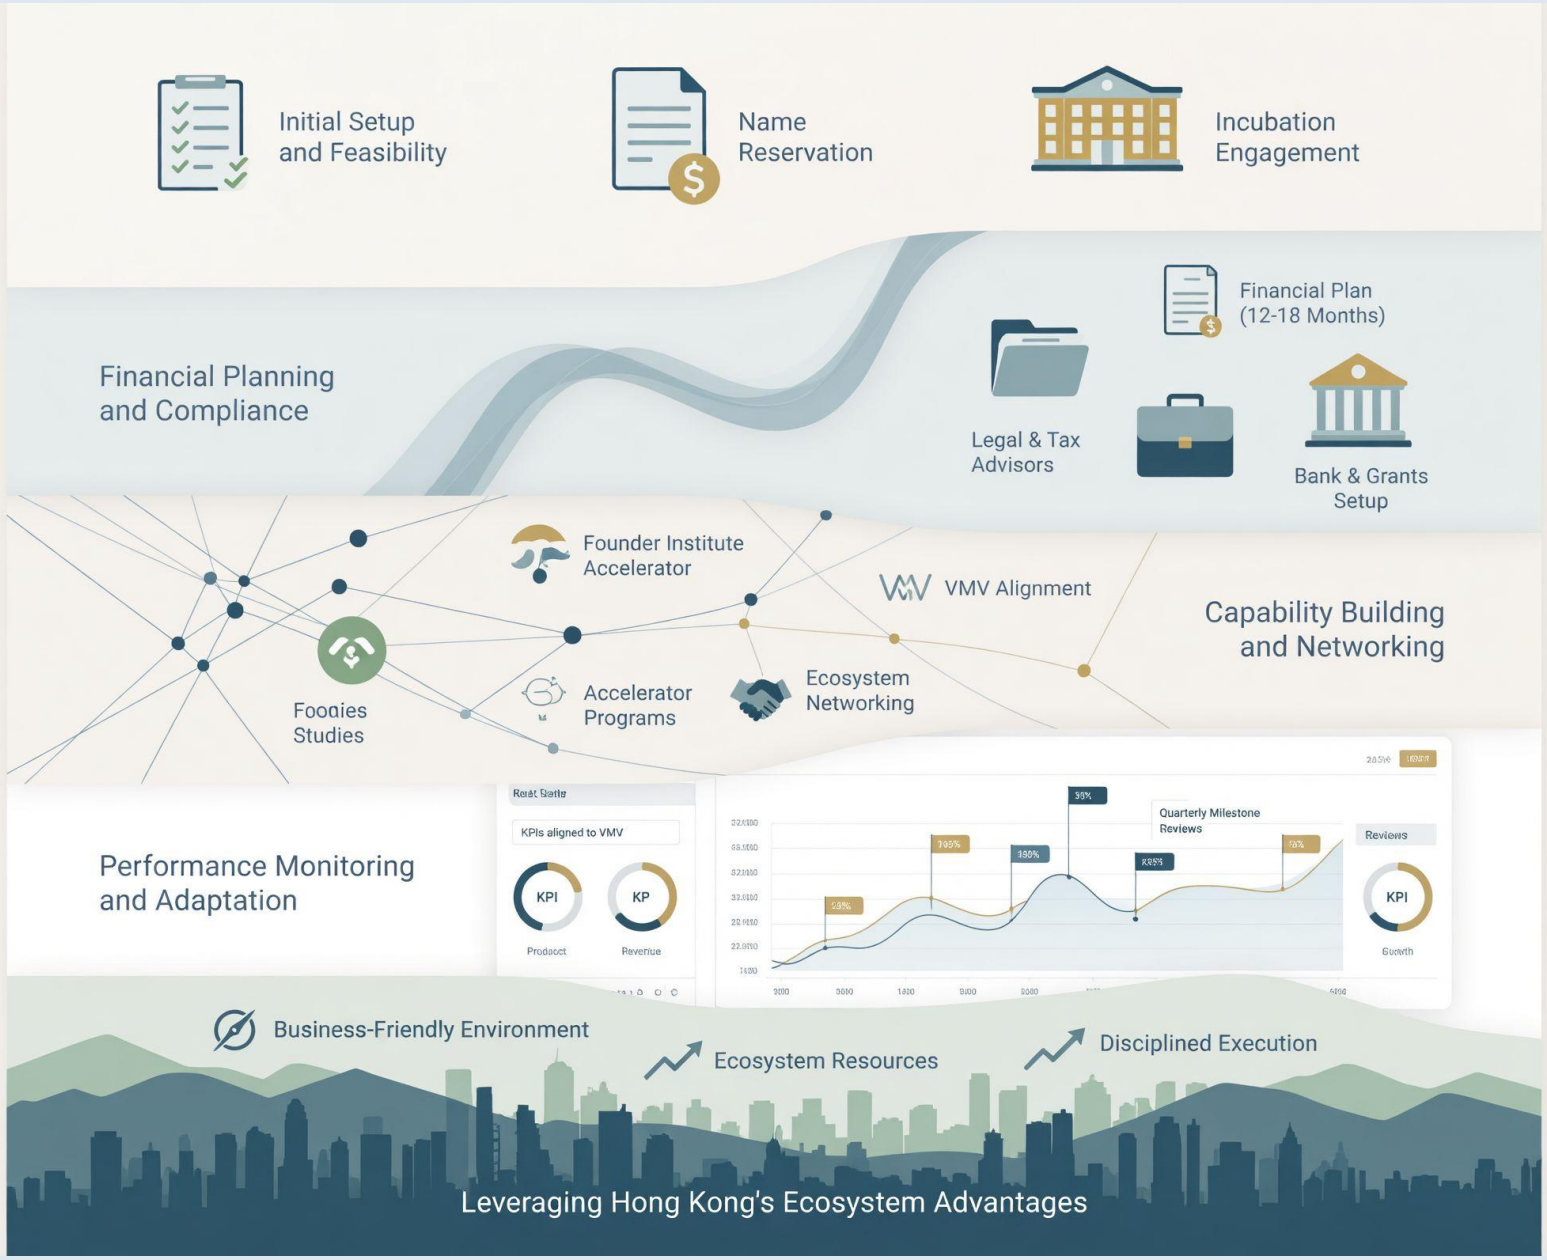

Break-Even Target

Networking and Support Ecosystem

Action Plans for Startups in HK

Chapter 6: Successful Example: Amazon for Setting up Company VMV

Ir Prof Alan Lam, JP

Powered by Poffices.AI

Background of Amazon's Startup Journey

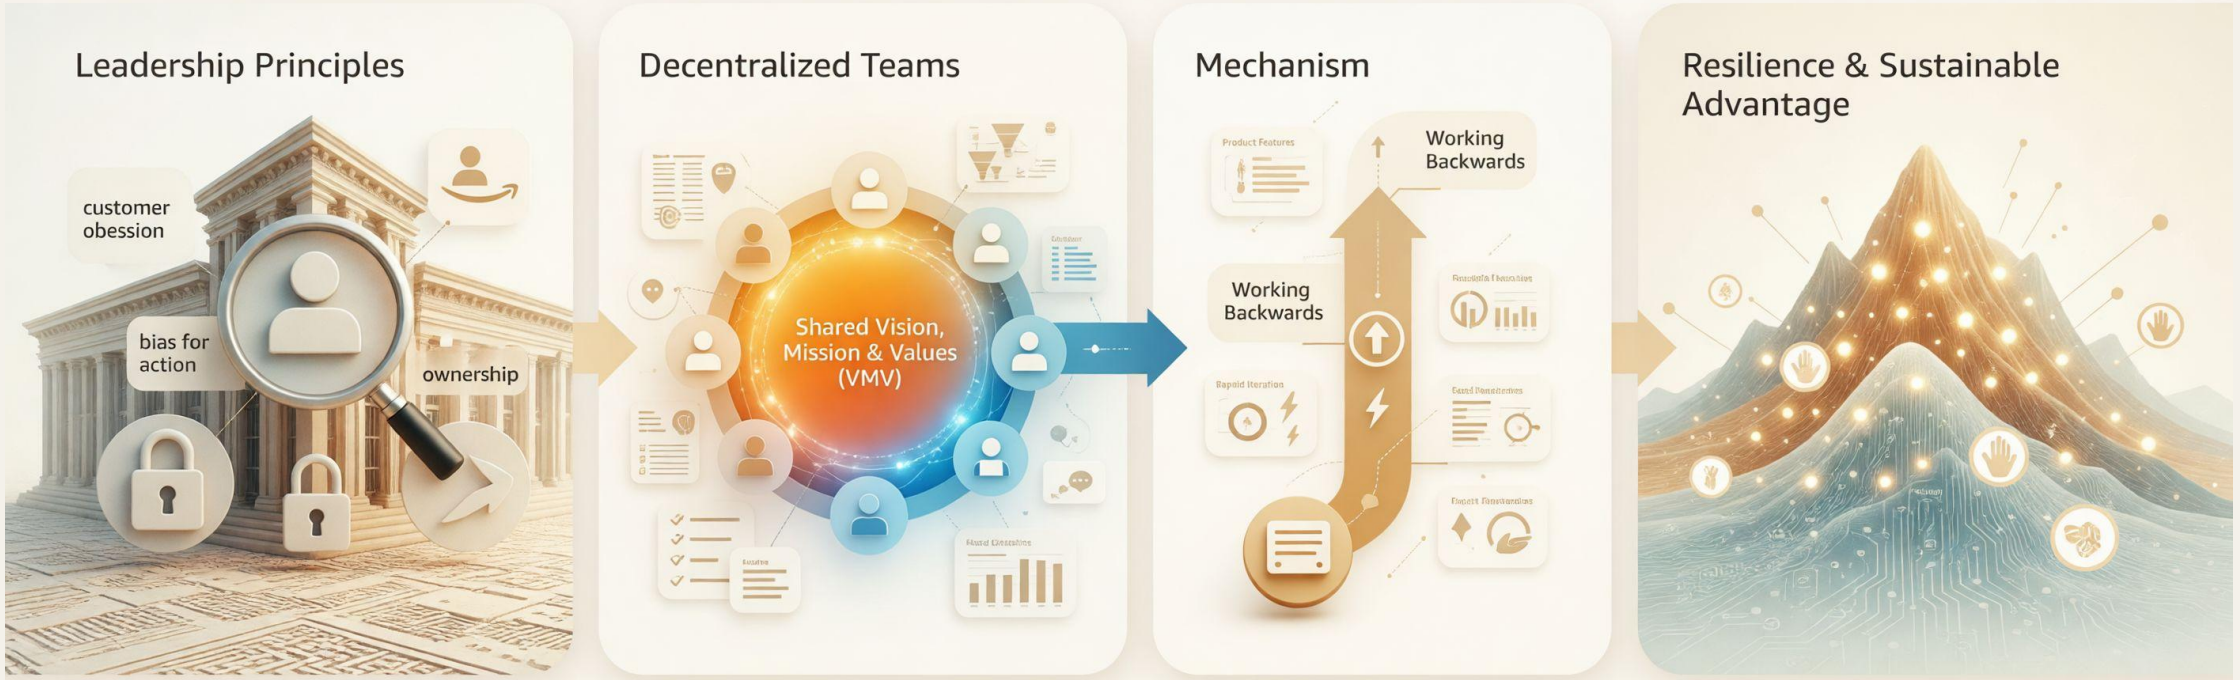

Amazon’s Early Business Model and VMV

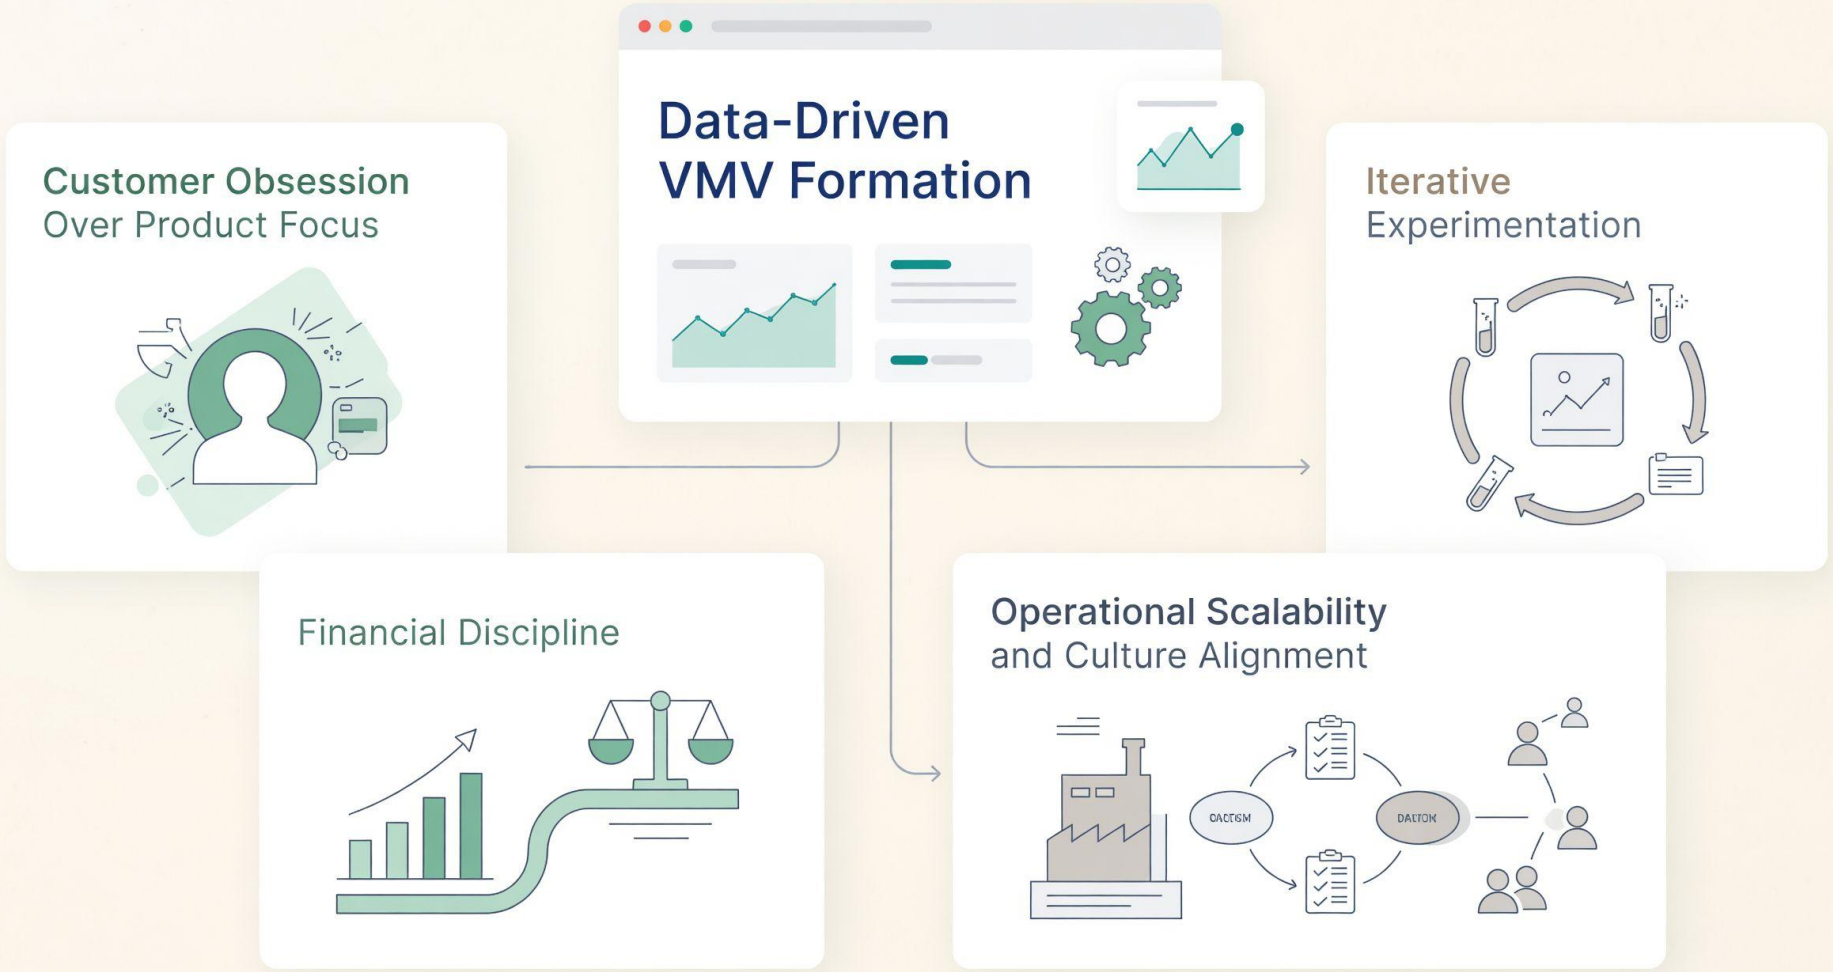

Lean Startup Practices in Amazon's Early Stages

Leadership and Culture in Amazon

Lessons Learned and Best Practices

Summary of Key Success Factors

Customer-Centric Vision and Values.

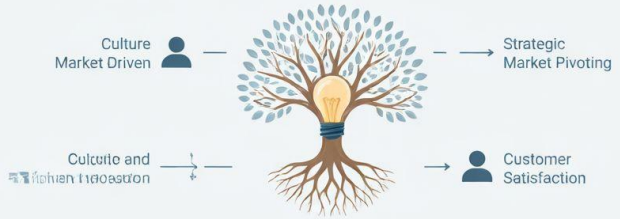

Lean Startup Methodology

Financial and Operational Discipline

Culture and Market Insight

In-Class Discussion:

- Please based on the today's lecture to summarize what did you learn.
- Select the best startup idea, apply the Lean Startup for your startup.
- Based on A-job-to-be-done framework to evaluate your startup.
- Make one Slide about Company Introduction and VMV based on Lean Startup framework.

Company VMV and Lean Setup
